CONTENTS OF VOLUME 71, 1981

## No. 1—JANUARY

1-3 **Acknowledgment of Reviewers**

4-6 **Author's Guide for Manuscript Preparation**

### ETIOLOGY

30-35 **Brownline of Prune Trees, a Disease Associated with Tomato Ringspot Virus Infection of Myrobalan and Peach Rootstocks** ..... S. M. Mircetich and J. W. Hoy

### DISEASE CONTROL AND PEST MANAGEMENT

50-53 **Effect of Mineral Fertilizers on the Incidence of Blossom-end Rot of Watermelon** ..... M. Cirulli and F. Ciccarese

53-59 **Relation of Ammonia and Nitrous Acid to Suppression of *Phytophthora* in Soils Amended with Nitrogenous Organic Substances** .... P. H. Tsao and J. J. Oster

82-85 **The Influence of Host and Pathogen Genotypes on the Apparent Infection Rates of Potato Late Blight Epidemics** ..... R. X. Latin, D. R. MacKenzie, and H. Cole, Jr.

90-93 ***Sporidesmium sclerotivorum:* Distribution and Function in Natural Biological Control of Sclerotial Fungi** ..... P. B. Adams and W. A. Ayers

### GENETICS

12-19 **Interactions Between Genes Controlling Pathogenicity in the Flax Rust Fungus** ..... G. J. Lawrence, G. M. E. Mayo and K. W. Shepherd

60-65 **Interspecific Crosses Between Closely Related Heterothallic *Phytophthora* Species** ..... B. R. Boccas

### CYTOLOGY AND HISTOLOGY

7-11 **Initiation and Development of Systemic Necrosis in Relation to Virus Concentration in Tobacco Ringspot Virus-Infected Cowpea** .. M. C. Edwards and G. N. Agrios

41-44 **Nuclear Ultrastructural Changes and Aggregates of Viruslike Particles in Mungbean Cells Affected by Mungbean Yellow Mosaic Disease** ..... P. Thongmeearkom, Y. Honda, Y. Saito, and R. Syamananda

73-76 **Histopathology of *Peronospora tabacina* in Systemically Infected Burley Tobacco** ..... R. D. Milholland, J. Papadopoulou, and M. Daykin

### PHYSIOLOGY AND BIOCHEMISTRY

36-41 **Purification and Partial Characterization of Maize Dwarf Mosaic Virus Strain A** ..... G. von Baumgarten and R. E. Ford

80-82 **Time-Course Studies on Virus Titer and DNA Component Ratio in Beans Infected with Bean Golden Mosaic Virus** ..... T. L. Shock and R. M. Goodman

94-97 **Age-Related Changes in Specificity and Glyceollin Production in the Hypocotyl Reaction of Soybeans to *Phytophthora megasperma* var. *sojae*** ..... G. Lazarovits, R. Stössel, and E. W. B. Ward

**ECOLOGY AND EPIDEMIOLOGY**

20-22 **Effect of Thiophanate on Epidemic Development of Anthracnose and Yield of Watermelon** ..... K. S. Amin and B. A. Ullasa

23-29 ***Erwinia chrysanthemi:* Reaction of Eight Plant Species to Strains from Several Hosts and to Strains of Other Erwinia Species** ..... R. S. Dickey

45-49 **Motility of *Erwinia amylovora*** (second printing of this article; see page 110) ..... A. K. Raymundo and S. M. Ries

65-68 **Host Specificity of *Phytophthora megasperma* from Douglas Fir, Soybean, and Alfalfa** ..... P. B. Hamm and E. M. Hansen

69-73 **Relationships of Numbers of Spores of *Phytophthora parasitica* var. *nicotianae* to Infection and Mortality of Tobacco** ..... M. E. Kannwischer and D. J. Mitchell

77-79 **The Effect of Time of Exposure to Inoculum, Plant Age, Root Development, and Root Wounding on Fusarium Yellows of Celery** ... L. P. Hart and R. M. Endo

85-90 **Comparative Morphology and Survival of Chlamydospores of *Fusarium roseum* 'Culmorum,' and 'Graminearum'** ..... J. W. Sitton and R. J. Cook

98-100 **Virulence of *Verticillium dahliae* and *V. albo-atrum* Isolates in Tomato Seedlings in Relation to Their Host of Origin and the Applied Cropping System** ..... E. C. Tjamos

**ABSTRACTS**

103-110 **Abstracts of papers presented at the 1980 meeting of the Pacific Division**

110 **Erratum**

## No. 2—FEBRUARY

**ETIOLOGY**

175-180 **Pathogenicity of *Penicillia* to Corn Ears** ..... R. W. Caldwell, J. Tuite, and W. W. Carlton

193-196 **Beet Western Yellows Virus—A Major Component of Some Potato Leaf Roll-Affected Plants** ..... J. E. Duffus

**DISEASE CONTROL AND PEST MANAGEMENT**

123-128 **Comparative Fungitoxicity of Captafol and Metalaxyl to *Phytophthora capsici*** ..... G. C. Papavizas and J. H. Bowers

164-166 **Effect of Protectant Fungicides on the Developmental Stages of *Phytophthora infestans* in Potato Foliage** ..... R. I. Bruck, W. E. Fry, A. E. Apple, and C. C. Mundt

167-170 **Effects of Fumigation and Fungal Antagonists on the Relationships of Inoculum Density to Infection Incidence and Disease Severity in Fusarium Crown Rot of Tomato** ..... J. J. Marois and D. J. Mitchell

186-188 **Mycoparasitic Effects of *Scytalidium uredinicola* on Aeciospore Production and Germination of *Cronartium querquum* f. sp. *fusiforme*** ..... E. G. Kuhlman

## GENETICS

156-163 **Genetics of Pathogenicity in *Puccinia coronata:* The Host Range Among Grasses** ..... N. Eshed and A. Dinoor

## PHYSIOLOGY AND BIOCHEMISTRY

116-119 **Virus Infection of *Trifolium* species in Cell Suspension Cultures** ..... R. A. Jones, E. A. Rupert, and O. W. Barnett

## TECHNIQUES

129-133 **Selective Isolation of *Phytophthora capsici* from Soils** ..... G. C. Papavizas, J. H. Bowers and S. A. Johnston

152-156 **Design of an Acoustical Particle Counter and Its Use in Phytopathological Research** ..... M. W. Imhoff and S. R. Coover

## ECOLOGY AND EPIDEMIOLOGY

111-115 **Effect of Light on Bacteria-Induced Hypersensitivity in Soybean** ..... L. R. Giddix, Jr., F. L. Lukezic and E. J. Pell

134-138 **Etiology and Epidemiology of Seedling Rot of Soybean by *Pythium ultimum*** ..... R. L. Schlub and J. L. Lockwood

189-192 **The Influence of Rotation Crops on Take-All Decline Phenomenon** ..... R. J. Cook

## CYTOLOGY AND HISTOLOGY

138-140 **A Histological Comparison of the Response of a Chrysanthemum Cultivar Susceptible to *Erwinia chrysanthemi* and *E. carotovora* subsp. *carotovora*** ..... B. W. Pennypacker, R. S. Dickey, and P. E. Nelson

141-148 **Histopathology of a Symptomless Chrysanthemum Cultivar Infected by *Erwinia chrysanthemi* or *E. caratovora* subsp. *carotovora*** ..... B. W. Pennypacker, C. M. Smith, R. S. Dickey, and P. E. Nelson

148-151 **Histopathology of Chrysanthemum Vascular Tissue Infected with *Erwinia carotovora* subsp. *carotovora*** ..... C. M. Smith and R. S. Dickey

171-175 **Scanning Electron Microscopy of the Ingress and Establishment of *Pseudomonas alboprecipitans* in Sweet Corn Leaves** ..... R. D. Gitaitis, D. A. Samuelson, and J. O. Strandberg

## RESISTANCE

119-123 **Inheritance of Tolerance to Septoria Leaf Blotch of Wheat** ..... O. Ziv, J. M. Sacks, and Z. Eyal

181-185 **Adult Plant Resistance of Thatcher Wheat to Stem Rust** ..... N. R. X. Nazareno and A. P. Roelfs

## ABSTRACTS

197-267 **Abstracts of papers presented at the 1980 Annual Meeting**

268 **Errata**

## No. 3—MARCH

### SPECIAL TOPICS

269-273 **Biological and Morphological Characterization of *Xanthomonas campestris* Bacteriophages** ..... K. W. Liew and A. M. Alvarez

274-276 **Phage Typing and Lysotype Distribution of *Xanthomonas campestris*** ..... K. W. Liew and A. M. Alvarez

### ETIOLOGY

276-282 **Morphology, Pathogenicity, and Host Range of *Phytophthora megasperma, P. erythroseptica,* and *P. parasitica* from Arrowleaf Clover** ..... R. G. Pratt

302-305 **Purification, Serology, and Particle Morphology of Two Russet Crack Strains of Sweet Potato Feathery Mottle Virus** ..... B. B. Cali and J. W. Moyer

340-345 **Verticillium Wilt of Maples: Symptoms Related to Movement of the Pathogen in Stems** ..... W. A. Sinclair, K. L. Smith, and A. O. Larsen

### ECOLOGY AND EPIDEMIOLOGY

286-290 **Isolation and Biocontrol Potential of *Trichoderma hamatum* from Soil Naturally Suppressive to *Rhizoctonia solani*** ..... I. Chet and R. Baker

345-347 **Sporulation by *Cronartium quercuum* f. sp. *fusiforme* on Loblolly and Slash Pine** ..... E. G. Kuhlman

348-350 **Parasite Interaction with Sporulation by *Cronartium quercuum* f. sp. *fusiforme* on Loblolly and Slash Pine** ..... E. G. Kuhlman

354-356 **The Evaluation of Relative Parasitic Fitness of Isolates of *Helminthosporium maydis* Race T** ..... L. V. Gregory, M. H. Royer, J. E. Ayers, and R. R. Nelson

### DISEASE CONTROL AND PEST MANAGEMENT

359-362 **Harvesting Method Effects on Aflatoxin Levels in Arizona Cottonseed** ..... T. E. Russell, P. von Bretzel, and J. Easley

### DISEASE DETECTION AND LOSSES

316-319 **Effects of *Pythium arrhenomanes* Infection and Root-Tip Amputation on Wheat Seedling Development** ..... L. L. Singleton and O. Ziv

324-328 **Distribution and Severity of Peanut Leafspot in Florida** ..... L. F. Jackson

331-333 **Use of Near-Isogenic Host Populations to Estimate the Effect of Three Foliage Diseases on Pearl Millet Forage Yield** ..... G. W. Burton and H. D. Wells

### CYTOLOGY AND HISTOLOGY

312-315 **Histopathology of Sweet Potato Roots Infected with *Monilochaetes infuscans*** ..... G. W. Lawrence, J. W. Moyer, and C. G. Van Dyke

### RESISTANCE

297-301 **Effects of Localized Infections of *Nicotiana tabacum* by Tobacco Mosaic Virus on Systemic Resistance Against Diverse Pathogens and an Insect** ..... J. L. McIntyre, J. A. Dodds, and J. D. Hare

319-323 **Studies of the Variable Reaction at High Temperature of $F_1$ Hybrid Tomato Plants Resistant to Tobacco Mosaic Virus** ..... M. Pilowsky, R. Frankel, and S. Cohen

334-336 ***Cercospora sojina* Race 5: A Threat to Soybeans in the Southeastern United States** ..... D. V. Phillips and H. R. Boerma

351-354 **The Effect of Host Resistance on Relative Parasitic Fitness of *Helminthosporium maydis* Race T** ..... M. H. Royer and R. R. Nelson

### TECHNIQUES

282-285 **A Nylon Fabric Technique for Studying the Ecology of *Pythium aphanidermatum* and Other Fungi in Soil** ..... R. D. Lumsden

295-296 **Improved Method for the Isolation and Propagation of Defective Tobacco Mosaic Virus Mutants** ..... J. J. Hubert and D. P. Bourque

306-308 **Improvements in the Passive Hemagglutination Technique for Serological Detection of Plant Viruses** ..... R. Rajeshwari, D. V. R. Reddy, and N. Iizuka

308-312 **Enzyme-Linked Immunosorbent Assay for Plant Viruses in Intact Leaf Tissue Disks** ..... C. P. Romaine, S. R. Newhart, and D. Anzola

336-339 **A Semiselective Medium for the Isolation of *Xanthomonas campestris* pv. *juglandis* from Walnut Buds and Catkins** ..... E. N. Mulrean and M. N. Schroth

### POSTHARVEST PATHOLOGY AND MYCOTOXINS

290-295 **Soft Rot Susceptibility of Potatoes with High Reducing Sugar Content** ..... V. Otazu and G. A. Secor

357-359 **The Effect of Seed Infected with *Phoma betae* on Rot and Sucrose Yield of Stored Sugar Beet** ..... W. M. Bugbee and D. F. Cole

### PHYSIOLOGY AND BIOCHEMISTRY

328-331 **Polygalacturonase from Citrus Fruit Infected with *Penicillium italicum*** ..... C. R. Barmore and G. E. Brown

362 **Erratum**

## No. 4—APRIL

### LETTER TO THE EDITOR

363-372 **Inoculum Potential and Soilborne Pathogens: The Essence of Every Model is Within the Frame** ..... R. Baker and R. Drury

### ETIOLOGY

415-418 **Seasonal Concentration of the Pierce's Disease Bacterium in Grapevine Stems, Petioles, and Leaf Veins** ..... D. L. Hopkins

435-438 **Serological Grouping of Cowpea Severe Mosaic Virus Isolates from Central Brazil** ..... M. T. Lin, J. R. N. Anjos, and G. P. Rios

468-472 **Physical and Chemical Properties of the Particles and Ribonucleic Acid of Blueberry Leaf Mottle Virus** ..... D. C. Ramsdell and R. Stace-Smith

**GENETICS**

442-445 **In Vitro Susceptibility and Resistance of Two Spiroplasmas to Antibiotics** ..... C. H. Liao and T. A. Chen

**DISEASE DETECTION AND LOSSES**

372-374 **Total Protein Content of Galled Roots as an Index of Root-Knot Nematode Infestation of Lady's Finger Plants** ..... A. Chatterjee and N. C. Sukul

**CYTOLOGY AND HISTOLOGY**

375-379 **Pathogenicity and Histopathology of *Botryosphaeria dothidea* on Apple Stems** ..... E. A. Brown and F. F. Hendrix

379-386 **Histopathology of Sweet Corn Seed and Plants Infected with *Fusarium moniliforme* and *F. oxysporum*** ..... E. B. Lawrence, P. E. Nelson, and J. E. Ayers

**RESISTANCE**

386-391 **Relative Effectiveness and Stability of Different Resistance Mechanisms to White Pine Blister Rust in Sugar Pine** ..... B. B. Kinloch, Jr., and J. W. Byler

396-399 **Effect of Energy-Requiring Defence Reactions on Yield and Grain Quality in a Powdery Mildew-Resistant Barley Cultivar** ..... V. Smedegaard-Petersen and O. Stølen

421-424 **Temperature Sensitivity of Reactions of *Populus* spp. to Races of *Melampsora larici-populina*** ..... M. Chandrashekar and W. A. Heather

425-428 **Genetic Control of Disease Expression in Stem Rust of Wheat** ..... W. Q. Loegering and E. R. Sears

**PHYSIOLOGY AND BIOCHEMISTRY**

392-395 **Photosynthesis, Transpiration, and Carbohydrate Content of Apple Leaves Infected by *Podosphaera leucotricha*** ..... M. A. Ellis, D. C. Ferree, and D. E. Spring

**TECHNIQUES**

400-404 **Immunosorbent Electron Microscopy for Detecting Apple Chlorotic Leaf Spot and Plum Pox Viruses** ..... C. Kerlan, B. Mille, and J. Dunez

408-411 **In Vivo Cultivation of Spiroplasmas in Larvae of the Greater Wax Moth** ..... R. E. McCoy, M. J. Davis, and R. V. Dowell

411-415 **Radioimmunosorbent Assay for *Botrytis cinerea*** ..... S. D. Savage and M. A. Sall

458-460 **Comparison of Techniques for Inoculating Sunflower Heads with Three Species of *Rhizopus*** ..... S. M. Yang and C. A. Thomas

**DISEASE CONTROL AND PEST MANAGEMENT**

418-421 **Effects of Methyl Bromide Dosage on Microorganisms in Soil Before and After Growth of *Nicotiana glutinosa*** ..... D. E. Millhouse and D. E. Munnecke

438-442 **Efficacy of Benomyl for Controlling Septoria Brown Spot of Soybeans** ..... J. K. Pataky and S. M. Lim

### VECTOR RELATIONS

429-435 **Vector Preference and Inoculation Efficiency as Components of Resistance to Pierce's Disease in European Grape Cultivars** ..... A. H. Purcell

### ECOLOGY AND EPIDEMIOLOGY

404-408 **Interaction of Two Potyviruses and *Meloidogyne incognita* in Chili Pepper** ..... S. R. Koenning and M. A. McClure

445-448 **Effects of Sulfur Dioxide on Expansion of Lesions Caused by *Corynebacterium nebraskense* in Maize and by *Xanthomonas phaseoli* var. *sojensis* in Soybean** ..... J. A. Laurence and A. L. Aluisio

449-453 **Epidemiological Studies of Blueberry Anthracnose Disease Caused by *Colletotrichum gloeosporioides*** ..... J. S. Hartung, C. L. Burton, and D. C. Ramsdell

454-457 **Germination, Appressorium Formation, and Infection of Immature and Mature Apple Fruit by *Glomerella cingulata*** ..... W. W. Shane and T. B. Sutton

461-467 **Quantitative Relationships Between Climatic Variables and Stripe Rust Epidemics on Winter Wheat** ..... S. M. Coakley and R. F. Line

## No. 5—MAY

473 **William Cowperthwaite Snyder, 1904–1980** ..... S. N. Smith, A. H. Gold, and J. R. Parmeter

### ETIOLOGY

479-481 **Effects of *Heterobasidion annosum* on Radial Growth in Southern Pine Beetle-Infested Loblolly Pine** ..... S. A. Alexander, J. M. Skelly, and R. S. Webb

544-547 **Effect of Seedborne *Diaporthe phaseolorum* var. *sojae* on Germination, Emergence, and Vigor of Soybean Seedlings** ..... M. M. Kulik and J. F. Schoen

### SPECIAL TOPICS

474-478 **Another Approach to Race Classification of *Fusarium oxysporum* f. sp. *pisi*** ..... G. M. Armstrong and J. K. Armstrong

### GENETICS

518-520 **Transfer from *Tripsacum dactyloides* to Corn of a Major Gene Locus Conditioning Resistance to *Puccinia sorghi*** ..... R. R. Bergquist

536-540 **Genetic Control of Ethirimol Resistance in a Natural Population of *Erysiphe graminis* f. sp. *hordei*** ..... D. W. Hollomon

### CYTOLOGY AND HISTOLOGY

524-528 **Ultrastructural Host Cell Changes Associated with Tomato Yellow Mosaic** ..... R. Lastra and F. Gil

## ECOLOGY AND EPIDEMIOLOGY

491-496 **Effects of *Meloidognye hapla* and *Macroposthonia ornata* on Cylindrocladium Black Rot of Peanut** ..... M. Diomande and M. K. Beute

499-504 **Effect of Water Potential on Reproduction and Spore Germination by *Fusarium roseum* 'Graminearum,' 'Culmorum,' and 'Avenaceum'** ..... J.-M. Sung and R. J. Cook

532-536 **Multiplication of *Pseudomonas syringae* pv. *glycinea* on Soybean Primary Leaves Exposed to Aerosolized Inoculum** ..... G. Surico, B. W. Kennedy, and G. L. Ercolani

540-543 **Eutypa Dieback of Grapevine: Seasonal Differences in Infection and Duration of Susceptibility of Pruning Wounds** ..... C. H. Petzoldt, W. J. Moller, and M. A. Sall

551-554 **Dissemination of Hymenomycetes by *Dendroctonus pseudotsugae* (Coleoptera: Scolytidae)** ..... T. C. Harrington, M. M. Furniss, and C. G. Shaw

## PHYSIOLOGY AND BIOCHEMISTRY

496-498 **Postulated Mechanism of Biological Control of Decay Fungi in Red Maple Wounds Treated with *Trichoderma harzianum*** ..... K. T. Smith, R. O. Blanchard, and W. C. Shortle

504-508 **Similarities Between Age-Related and Race-Specific Resistance of Soybean Hypocotyls to *Phytophthora megasperma* var. *sojae*** ..... E. W. B. Ward, P. Stössel, and G. Lazarovits

521-524 **Wood Decay Inhibition by Tropical Hardwood Extractives and Related Compounds** ..... W. E. Eslyn, J. D. Bultman, and L. Jurd

## DISEASE CONTROL AND PEST MANAGEMENT

509-514 **Systemic Translocation of $^{14}$C-Labeled Metalaxyl in Tomato, Avocado, and *Persea indica*** ..... A. I. Zaki, G. A. Zentmyer, and H. M. LeBaron

529-532 **Competition Between Benomyl-Resistant and Sensitive Strains of *Venturia inaequalis* on Apple Seedlings** ..... D. C. McGee and M. G. Zuck

## RESISTANCE

482-487 **Biological Aspects of Citrus Molds Tolerant to Benzimidazole Fungicides** ..... Y. Gutter, A. Shachnai, M. Schiffman-Nadel, and A. Dinoor

488-491 **Inheritance of Resistance to Anthracnose Leaf Blight in Five Inbred Lines of Corn** ..... M. L. Carson and A. L. Hooker

547-550 **Epiphytic Populations of *Pseudomonas syringae* on Susceptible and Resistant Bean Lines** ..... M. E. Daub and D. J. Hagedorn

## POSTHARVEST PATHOLOGY AND MYCOTOXINS

515-518 **Infiltration of Tomatoes by Aqueous Bacterial Suspensions** ..... J. A. Bartz and R. K. Showalter

## ABSTRACTS

555-566 **Abstracts of papers presented at the 1980 meeting of the Northeastern Division**

## No. 6—JUNE

### LETTER TO THE EDITOR

567-568 **Durable Resistance: Definition of, Genetic Control, and Attainment in Plant Breeding** ..... R. Johnson

### ETIOLOGY

572-577 **Characterization of a Tombusvirus Isolated from Eggplant** ..... K. M. Makkouk, R. Koenig, and D.-E. Lesemann

602-604 **Characterization of Potyvirus Causing a Leaf Distortion Disease of *Tradescantia* and *Zebrina* Species** ..... B. E. Lockhart, J. A. Betzold, and F. L. Pfleger

656-660 **Infection Courts and Systemic Movement of $^{32}$P-Labeled *Erwinia amylovora* in Apple Petioles and Stems** ..... C. G. Suhayda and R. N. Goodman

### GENETICS

639-642 **Use of P-1 Incompatibility Group Plasmids to Introduce Transposons into *Pseudomonas solanacearum*** ..... C. Boucher, B. Message, D. Debieu, and C. Zischek

652-655 **Inheritance of Virulence and Uredial Color and Size in *Puccinia recondita tritici*** ..... G. D. Statler and D. A. Jones

### CYTOLOGY AND HISTOLOGY

617-623 **Electron Microscope Study of Race-Specific and Age-Related Resistant and Susceptible Reactions of Soybeans to *Phytophthora megasperma* var. *sojae*** ..... P. Stössel, G. Lazarovits, and E. W. B. Ward

645-652 **Effects of Light Intensity, Photoperiod, and Temperature on Symptom Expression and Host and Virus Ultrastructure in *Saponaria vaccaria* Infected with Carnation Etched Ring Virus** ..... S. S. Hearon and R. H. Lawson

### ECOLOGY AND EPIDEMIOLOGY

577-583 **Effect of Temperature, Dew Period, and Age of Leaves, Spores, and Source Pustules on Germination of Bean Rust Urediospores** ..... M. W. Imhoff, C. E. Main, and K. J. Leonard

584-589 **Production and Dispersal of Ascospores and Conidia by *Physalospora obtusa* and *Botryosphaeria dothidea* in Apple Orchards** ..... T. B. Sutton

593-596 **Variation in Virulence in Isolates of *Septoria nodorum*** ..... R. C. Rufty, T. T. Hebert, and C. F. Murphy

629-632 **Effects of Exogenous Nutrients and Inoculum Quantity on the Virulence of *Pythium ultimum* to Cotton Hypocotyls** ..... L. F. Johnson, C.-C. Hsieh, and E. D. Sutherland

642-644 **Plant Growth-Promoting Rhizobacteria and Plant Growth Under Gnotobiotic Conditions** ..... J. W. Kloepper and M. N. Schroth

**TECHNIQUES**

590-592 **Development of a Powder Formulation of Rhizobacteria for Inoculation of Potato Seed Pieces** ..... J. W. Kloepper and M. N. Schroth

596-598 **A Rapid Staining Method for *Erysiphe graminis* f. sp. *hordei* in and on Whole Barley Leaves with a Protein-Specific Dye** ..... G. Wolf and F. Frič

**RESISTANCE**

608-611 **Some Components of Slow-Blasting Resistance in Rice** ..... R. L. Villareal, R. R. Nelson, D. R. MacKenzie, and W. R. Coffman

623-629 **Resistance of Selected Potato Cultivars and Clones to Fusarium Dry Rot** ..... S. S. Leach and R. E. Webb

633-638 **Effect of Resistance on Growth of *Cercospora beticola* Race C2 on the Leaf Surface and within Leaf Tissue of Sugar Beet** ..... E. D. Whitney and N. F. Mann

**DISEASE DETECTION AND LOSSES**

605-608 **Sugar and Root Yield of Sugar Beets as Affected by Bacterial Vascular Necrosis and Rot, Nitrogen Fertilization, and Plant Spacing** ..... S. V. Thomson, F. J. Hills, E. D. Whitney, and M. N. Schroth

661-662 **Incidence, Severity, and Growth Effects of *Heterobasidion annosum* in Unthinned Loblolly Pine Plantations** ..... R. S. Webb, S. A. Alexander, and J. M. Skelly

**DISEASE CONTROL AND PEST MANAGEMENT**

569-572 **Factors Affecting *Trichoderma hamatum* Applied to Seeds as a Biocontrol Agent** .... G. E. Harman, I. Chet, and R. Baker

612-616 **Analysis of Potato Late Blight Epidemiology by Simulation Modeling** ..... J. A. Bruhn and W. E. Fry

**VECTOR RELATIONS**

598-602 **Inoculation of the Aphids *Hyperomyzus lactucae* and *Chaetosiphon jacobi* with Isolates of Sowthistle Yellow Vein Virus and Strawberry Crinkle Virus** ..... E. S. Sylvester and J. Richardson

No. 7—JULY

663 **Charles Stewart Holton, 1904–1980** ..... G. W. Fischer

664 **Samuel Andrew Wingard, 1895–1980** ..... R. G. Henderson and C. W. Roane

**LETTER TO THE EDITOR**

665-666 **On Estimating Parasitic Fitness** ..... R. A. Fleming

## ETIOLOGY

667-672 **Characterization of a Potyvirus That Causes Zucchini Yellow Mosaic** ..... V. Lisa, G. Boccardo, G. D'Agostino, G. Dellavalle, and M. d'Aquilio

673-678 **Virions and Ultrastructural Changes Associated with Blueberry Red Ringspot Disease** ..... K. S. Kim, D. C. Ramsdell, J. M. Gillett, and J. P. Fulton

## ECOLOGY AND EPIDEMIOLOGY

679-684 **Biotypes of *Stemphylium botryosum* on Alfalfa in North America** ..... W. A. Cowling, D. G. Gilchrist, and J. H. Graham

690-693 **Persistence of *Pseudomonas solanacearum* (Race 1) in a Naturally Infested Soil in Costa Rica** ..... M. T. Jackson and L. C. González

693-696 **Colonization of Soybean Seeds and Plant Tissue by *Fusarium* Species in Soil** ..... R. L. Schlub, J. L. Lockwood, and H. Komada

712-715 **Influence of Vesicular Arbuscular Mycorrhizae on the Growth of Apple and Corn in Low-Phosphorus Soil** ..... R. P. Covey, B. L. Koch, and H. J. Larsen

716-719 **Comparison of the Gompertz and Logistic Equations to Describe Plant Disease Progress** ..... R. D. Berger

720-722 **Preemergence Herbicides and the Severity of Leaf Spot Caused by *Drechslera sorokiniana* on *Poa pratensis*** ..... C. F. Hodges

728-732 **A Model for Detecting Infection Periods of *Coccomyces hiemalis* on Sour Cherry** ..... S. P. Eisensmith and A. L. Jones

## CYTOLOGY AND HISTOLOGY

697-707 **Early Proliferation and Migration and Subsequent Xylem Occlusion by *Erwinia amylovora* and the Fate of its Extracellular Polysaccharide (EPS) in Apple Shoots** ..... C. G. Suhayda and R. N. Goodman

732-736 **Relation of Postpenetration Events in Idaed 59 Wheat Seedlings to Low Receptivity to Infection by *Puccinia graminis* f. sp. *tritici*** ..... J. B. Rowell

## DISEASE DETECTION AND LOSSES

685-689 **A Loss Model for Crops** ..... L. V. Madden, S. P. Pennypacker, C. E. Antle, and C. H. Kingsolver

## DISEASE CONTROL AND PEST MANAGEMENT

737-742 **Evaluation of Two Triazole Fungicides for Postinfection Control of Apple Scab** ..... R. D. Kelley and A. L. Jones

## PHYSIOLOGY AND BIOCHEMISTRY

708-711 **Accumulation of Furanoterpenoids in Sweet Potato Tissue Following Inoculation with Different Pathogens** ..... C. A. Clark, A. Lawrence, and F. A. Martin

722-727 **The Effects of the Fungicide, Iprodione, on the Mycelium of *Sclerotinia sclerotiorum*** ..... C. C. Reilly and G. L. Lamoureux

## SYMPOSIUM ON SPECIFICITY IN HOST-PARASITE AND OTHER CELLULAR INTERACTIONS

744-746 **Are Lectins Involved in Plant-Fungus Interactions?** ..... M. E. Etzler

747-751 **A Major Incompatibility System in Mice—The H-2 Complex** ..... W. C. Davis

752-755 **Biochemistry and Physiology of Recognition in Pollen-Stigma Interactions** ..... T. E. Ferrari, S. S. Lee, and D. H. Wallace

756-762 **Molecular Communication in Host-Parasite Interactions: Hexosamine Polymers (Chitosan) as Regulator Compounds in Race-Specific and Other Interactions** ..... L. A. Hadwiger and D. C. Loschke

## ABSTRACTS

763-772 **Abstracts of papers presented at the 1981 meeting of the Potomac Division**

# No. 8—AUGUST

## ETIOLOGY

819-822 **Maintenance In Vitro of the Aster Yellows Mycoplasmalike Organism** ..... A. J. Smith, R. E. McCoy, and J. H. Tsai

## PHYSIOLOGY AND BIOCHEMISTRY

800-803 **Demethylmedicarpin, A Product Formed from Medicarpin by *Colletotrichum coccodes*** ..... V. J. Higgins and J. L. Ingham

825-830 **Ethylene Production by Cultures of *Cylindrocladium floridanum* and *C. scoparium*** ..... P. E. Axelrood-McCarthy and R. G. Linderman

853-854 **Victorin Production Stimulated by Oat Flakes** ..... H. Wheeler and D. Gantz

## ECOLOGY AND EPIDEMIOLOGY

773-776 **Beet Necrotic Yellow Vein Virus in North America** ..... A. M. Al Musa and G. I. Mink

796-799 **Time for Infection of Maize Kernels by *Fusarium moniliforme* and *Cephalosporium acremonium*** ..... S. B. King

804-807 **Provenance and Family Variation in Response of *Fraxinus americana* and *F. pennsylvanica* to Ozone and Sulfur Dioxide** ..... D. F. Karnosky and K. C. Steiner

810-816 **Planting Date, Harvest Date, and Irrigation Effects on Infection and Aflatoxin Production by *Aspergillus flavus* in Field Corn** ..... R. K. Jones, H. E. Duncan, and P. B. Hamilton

823-824 **Effect of Temperature on Susceptibility of Normal and Aberrant Ratio Corn Stocks to Barley Stripe Mosaic and Wheat Streak Mosiac Viruses** ..... M. K. Brakke and R. Samson

831-834 **Predisposing Effects of Soil Moisture Extremes on the Susceptibility of Rhododendron to Phytophthora Root and Crown Rot** ..... N. S. Blaker and J. D. MacDonald

839-843 **Epidemiology of *Puccinia chondrillina*, a Rust Pathogen for the Biological Control of Rush Skeleton Weed in the United States** ..... R. G. Emge, J. S. Melching, and C. H. Kingsolver

**CYTOLOGY AND HISTOLOGY**

777-783 **Histopathology of *Pinus radiata* Seedlings Infected by *Colletotrichum acutatum* f. sp. *pinea*** ..... J. Nair and J. B. Corbin

844-852 **Xylem Parenchyma Plasmolysis and Vessel Wall Disorientation Caused by *Erwinia amylovora*** ..... R. N. Goodman and J. A. White

**RESISTANCE**

783-787 **Evaluation of Systemic Resistance to Blue Mold Induced in Tobacco Leaves by Prior Stem Inoculation with *Peronospora hyoscyami* f. sp. *tabacina*** ..... Y. Cohen and J. Kuć

787-791 **Susceptibility of Peanut Leaves to *Cercosporidium personatum*** ..... M. Cook

817-818 **Inheritance of Resistance to Lettuce Mosaic Virus in Safflower** ..... C. A. Thomas

835-838 **Inheritance of Slow Rusting and the Relationship of *Sr* Genes to Slow Rusting in the Wheat Line FKN** ..... J. E. Ayers, J. W. Southern, A. P. Roelfs, and R. D. Wilcoxson

**VECTOR RELATIONS**

807-809 **Effect of Fixation and Helper Component on the Detection of Potato Virus Y in Alimentary Tract Extracts of *Myzus persicae*** ..... D. Lopez-Abella, T. P. Pirone, R. E. Mernaugh, and M. C. Johnson

**POSTHARVEST PATHOLOGY AND MYCOTOXINS**

792-796 **Mycoflora of Corn Produced in Human Esophageal Cancer Areas in Transkei, Southern Africa** ..... W. F. O. Marasas, F. C. Wehner, S. J. van Rensburg, and D. J. van Schalkwyk

855-914 **Abstracts of papers presented at the 1981 Annual Meeting of The American Phytopathological Society**

## No. 9—SEPTEMBER

**LETTER TO THE EDITOR**

915-916 **Disease Tolerance—an Indicator of Thresholds?** ..... R. E. Gaunt

**RESISTANCE**

937-941 **Effectiveness of Resistance to Maize Dwarf Mosaic and Maize Chlorotic Dwarf Viruses in Maize** ..... G. E. Scott and E. Rosenkranz

**PHYSIOLOGY AND BIOCHEMISTRY**

951-954 **Toxin Production by *Fusarium solani* From Fibrous Roots of Blight-Diseased Citrus** ..... R. A. Baker, J. H. Tatum, and S. Nemec, Jr.

964-966 **Altered Pattern of Root Formation on Cuttings of *Gynura aurantiaca* Infected by Citrus Exocortis Viroid** ..... R. Flores and J.-L. Rodriguez

## VECTOR RELATIONS

922-924 **Efficiency and Selectivity of the Helper-Component-Mediated Aphid Transmission of Purified Potyviruses** ..... T. P. Pirone

## ECOLOGY AND EPIDEMIOLOGY

917-921 **Infection Rates in Three Pathosystem Epidemics Initiated With Reduced Disease Severities** ..... J. L. Plaut and R. D. Berger

925-928 **The Effect of Temperature on Growth and Pathogenesis of *Phytophthora cinnamomi* and on Growth of Its Avocado Host** ..... G. A. Zentmyer

941-947 **Epidemiology of Cytospora Canker Caused in Colorado Blue Spruce by *Valsa kunzei*** ..... L. K. Kamiri and F. F. Laemmlen

## DISEASE CONTROL AND PEST MANAGEMENT

929-933 **Growth of *Penicillium oxalicum* as a Biological Seed Treatment of Pea Seed in Soil** ..... C. E. Windels

934-936 **Fungitoxic Activity of Efosite Aluminum on Growth, Sporulation, and Germination of *Phytophthora parasitica* and *P. citrophthora*** ..... A. Farih, P. H. Tsao, and J. A. Menge

947-950 **Fungicide Influence on the Relationship between Incidence and Severity of Powdery Mildew on Apple** ..... R. C. Seem, J. D. Gilpatrick, and R. C. Pearson

954-959 **Soil Solarization: Effects on Verticillium Wilt of Cotton and Soilborne Populations of *Verticillium dahliae*, *Pythium* spp., *Rhizoctonia solani*, and *Thielaviopsis basicola*** ..... G. S. Pullman, J. E. DeVay, R. H. Garber, and A. R. Weinhold

959-964 **Soil Solarization and Thermal Death: A Logarithmic Relationship Between Time and Temperature for Four Soilborne Plant Pathogens** ..... G. S. Pullman, J. E. DeVay and R. H. Garber

## STAKMAN-CRAIGIE SYMPOSIUM ON RUST DISEASES

968-971 **The Coffee Rust Situation in Latin America in 1980** ..... F. L. Wellman and E. Echandi

971-975 **Resistance of Plants to Rust Infection** ..... M. C. Heath

975-983 **Ontogeny of Mono- and Dikaryotic Rust Haustoria: Cytochemical and Ultrastructural Studies** ..... J. Chong, D. E. Harder, and R. Rohringer

983-989 **Nutrient Uptake in Rust Fungi** ..... K. Mendgen

989-993 **Genetics of Slow Rusting in Cereals** ..... R. D. Wilcoxson

993-997 **Application of Genetic Disease Resistance for the Control of Fusiform Rust in Intensively Managed Southern Pine** ..... R. A. Schmidt, H. R. Powers, Jr., and G. A. Snow

997-1000 **Natural Control of White Pine Blister Rust by *Tuberculina maxima*** ..... E. F. Wicker

## ABSTRACTS

1001-1008 **Abstracts of papers presented at the 1981 meeting of the Pacific Division**

## No. 10—OCTOBER

1009 **Carlyle Wilson Bennett, 1895–1981** ..... J. S. McFarlane

### LETTERS TO THE EDITOR

1010-1012 **The Sorting and Analysis of Infection Types from *Triticum aestivum/Puccinia recondita* Interactions** ..... D. R. Knott and R. Johnson

1012-1014 **Suppressors of Defense Reactions: A Model for Roles in Specificity** ..... W. R. Bushnell and J. B. Rowell

### ETIOLOGY

1037-1042 **Identification and Nutritional Differentiation of the Erwinia Sugar Beet Pathogen from Members of *Erwinia carotovora* and *Erwinia chrysanthemi*** ..... S. V. Thomson, and D. C. Hildebrand, and M. N. Schroth

1067-1072 **Association of a Spiroplasma with Brittle Root of Horseradish** ..... B. C. Raju, G. Nyland, E. A. Backus, and D. L. McLean

1073-1080 **Brittle Root of Horseradish: Evidence for an Etiological Role of *Spiroplasma citri*** ..... J. Fletcher, G. A. Schultz, R. E. Davis, C. E. Eastman, and R. M. Goodman

1086-1089 **Characterization of Isolates of Four Aphid-Transmitted Sweet Potato Viruses** ..... M. A. Cadena-Hinojosa and R. N. Campbell

1104-1107 **Tiningaja and Bristle Top, Coconut Diseases of Uncertain Etiology in Guam, and Their Relationship to Cadang-Cadang Disease of Coconut in the Philippines** ..... G. Boccardo, R. G. Beaver, J. W. Randles, and J. S. Imperial

### RESISTANCE

1090-1092 **Reaction of Field-Resistant Slash Pines to Selected Isolates of *Cronartium querquum* f. sp. *fusiforme*** ..... C. H. Walkinshaw and C. F. Bey

### CYTOLOGY AND HISTOLOGY

1043-1050 **Histopathology of A Susceptible Chrysanthemum Cultivar Infected with *Fusarium oxysporum* f. sp. *chrysanthemi*** ..... G. Emberger and P. E. Nelson

1062-1066 **Incompatibility Conditioned by the *Mla* Gene in Powdery Mildew of Barley: The Halt in Cytoplasmic Streaming** ..... W. R. Bushnell

### ECOLOGY AND EPIDEMIOLOGY

1015-1020 **Distribution of Wheat Powdery Mildew Incidence in Field Plots and Relationship to Disease Severity** ..... D. I. Rouse, D. R. MacKenzie, R. R. Nelson, and V. J. Elliott

1020-1024 **Relationship of in vitro Antibiosis of Plant Growth-Promoting Rhizobacteria to Plant Growth and the Displacement of Root Microflora** ..... J. W. Kloepper and M. N. Schroth

1027-1029 **Effects of Humidity, Temperature, Fertility, and Cultivar on the Reduction of Soybean Seed Quality by *Phomopsis* sp.** ..... D. A. Spilker, A. F. Schmitthenner, and C. W. Ellett

1030-1032 **Evaluation of a New York Ascospore Maturity Model for *Venturia inaequalis* in North Carolina** ..... T. B. Sutton, J. R. James, and J. F. Nardacci

1033-1037 **Longevity of *Pythium ultimum* in Moist Soils** ..... J. G. Hancock

1051-1056 **Effects of Row Width and Plant Growth Habit on Septoria Brown Spot Development and Soybean Yield** ..... J. K. Pataky and S. M. Lim

1080-1085 **Variation in Pathogenicity, Virulence, and Aggressiveness of *Septoria nodorum* in Florida** ..... E. A. Allingham and L. F. Jackson

1092-1099 **Eruptive Germination of Sclerotia of *Sclerotium rolfsii*** ..... Z. K. Punja and R. G. Grogan

1099-1103 **Mycelial Growth and Infection Without a Food Base by Eruptively Germinating Sclerotia of *Sclerotium rolfsii*** ..... Z. K. Punja and R. G. Grogan

1108-1110 **Aberrant Behavior of *Mycosphaerella citri* on Freeze-Killed Citrus Leaf Tissue and Its Taxonomic and Epidemiologic Implications** ..... J. O. Whiteside

**PHYSIOLOGY AND BIOCHEMISTRY**

1024-1027 **Different Induction Periods for Hypersensitivity in Pepper to *Xanthomonas vesicatoria* Determined with Antimicrobial Agents** .... M. E. Meadows and R. E. Stall

**TECHNIQUES**

1111-1112 **Induced Teliospore Formation by *Phakopsora pachyrhizi* on Soybeans and Other Hosts** ..... C. C. Yeh, A. T. Tschanz, and J. B. Sinclair

**POSTHARVEST PATHOLOGY AND MYCOTOXINS**

1057-1062 **Variation in the Latent Period of Bacterial Soft Rot in Tomato Fruit** ..... J. A. Bartz

**ABSTRACTS**

1113-1118 **Abstracts of papers presented at the 1981 meeting of the North Central Division**

1118 **Errata**

## No. 11—NOVEMBER

**LETTERS TO THE EDITOR**

1119-1121 **Effects of Alternating and Mixing Pesticides on the Buildup of Fungal Resistance** ..... G. Skylakakis

1121-1123 **A Generalized Concept of Host-Parasite Specificity** ..... M. C. Heath

**ETIOLOGY**

1124-1128 **Etiology and Histology of Alternaria Rot of Persimmon Fruits** ..... D. Prusky, R. Ben-Arie, and S. Guelfat-Reich

1137-1145 **Cryptosphaeria Canker and Libertella Decay of Aspen** ..... T. E. Hinds

1145-1149 **Pathogenicity of Epiphytic *Fusarium moniliforme* var. *subglutinans* to Pineapple** ..... J. C. Dianese, H. A. Bolkan, C. B. da Silva, and F. A. A. Couto

1156-1161 **Etiology of Phoney Peach and Plum Leaf Scald Diseases** ..... J. M. Wells, B. C. Raju, J. M. Thompson, and S. K. Lowe

1196-1198 **Seedborne *Fusarium moniliforme* and Seedling Infection in Hybrid Sweet Corn** ..... J. Anderegg and J. W. Guthrie

1203-1207 **Production, Storage, Germination, and Infectivity of Uredospores of *Uredo eichhorniae* and *Uromyces pontederiae*** ..... R. Charudattan, D. E. McKinney, and K. T. Hepting

1221-1224 **Detection of Four Isometric Plant Viruses in Sodium Dodecyl Sulfate Immunodiffusion Tests** ..... D. E. Purcifull, S. R. Christie, and J. A. A. Lima

**GENETICS**

1198-1202 **Hypovirulence, Vegetative Incompatibility, and the Growth of Cankers of Chestnut Blight** ..... S. L. Anagnostakis and P. E. Waggoner

**CYTOLOGY AND HISTOLOGY**

1133-1137 **Distribution of Ultrastructure of *Peronosclerospora maydis* in Maize Shoot Tips** ..... K. Takahashi, T. Inaba, and T. Kajiwara

1152-1155 **Histopathology of the Apical Leaves of a Susceptible Chrysanthemum Cultivar Infected with *Fusarium oxysporum* f. sp. *chrysanthemi*** ..... B. A. Stuehling and P. E. Nelson

1162-1168 **Anatomy of a Tolerant Chrysanthemum Cultivar Infected with *Fusarium oxysporum* f. sp. *chrysanthemi*** ..... B. A. Stuehling and P. E. Nelson

**ECOLOGY AND EPIDEMIOLOGY**

1129-1132 **Soybean Cultivar Hodgson Response to Ozone** ..... G. C. Pratt and S. V. Krupa

1181-1184 **Effect of Temperature, Relative Humidity and Rehydration Rate on Germination of Dried Sporangia of *Phytophthora infestans*** ..... K. P. Minogue and W. E. Fry

1215-1220 **Cruciferous Weeds as Sources of Inoculum of *Xanthomonas campestris* in Black Rot of Crucifers** ..... N. W. Schaad and J. C. Dianese

**RESISTANCE**

1184-1186 **The Relationship Between Slow Rusting and a Specific Resistance Gene for Wheat Stem Rust** ..... J. B. Rowell

1190-1196 **Inheritance of Resistance to Stalk Rot of Corn Caused by *Colletotrichum graminicola*** ..... M. L. Carson and A. L. Hooker

**PHYSIOLOGY AND BIOCHEMISTRY**

1173-1177 **The Effects of *Septoria nodorum* and *Xanthomonas translucens* f. sp. *undulosa* on Photosynthesis and Transpiration of Wheat Flag Leaves** ..... J. B. Jones, C. W. Roane, and D. D. Wolf

1208-1212 **The Influence of Soil Moisture on Macroscopic Sulfur Dioxide Injury to Pinto Bean Foliage** ..... J. A. Davids, D. D. Davis, and S. P. Pennypacker

1212-1215 **Simultaneous Detoxification of Phytoalexins by *Fusarium solani* f. sp. *phaseoli*** ..... D. A. Smith, J. M. Harrer, and T. E. Cleveland

**TECHNIQUES**

1169-1172 **A "Most Probable Number" Method for Estimating Inoculum Density of *Aphanomyces euteiches* in Naturally Infested Soil** ..... W. F. Pfender, D. I. Rouse, and D. J. Hagedorn

1187-1190 **A Vacuum Infiltration Inoculation Technique for Detecting *Pseudomonas tomato* in Soil and Plant Tissue** ..... J. B. Jones, S. M. McCarter, and D. R. Smitley

1225-1228 **A Method of Evaluating Postemergence Damping-Off Pathogens of Bedding Plants** ..... C. T. Stephens, C. C. Powell, and A. F. Schmitthenner

### DISEASE DETECTION AND LOSSES

1149-1152 **Infection of Cultivated Strawberries by Tomato Ringspot Virus** ..... R. H. Converse

1178-1181 **Forecasting Onion White Rot Disease** ..... P. B. Adams

1228 **Errata**

## No. 12—DECEMBER

### LETTER TO THE EDITOR

1129-1231 **Calculating Rhizosphere Size** ..... R. S. Ferriss

### ETIOLOGY

1238-1241 **Bacterial Blight Incited in Parsnip by *Pseudomonas marginalis* and *Pseudomonas viridiflava*** ..... J. E. Hunter and J. A. Cigna

1264-1269 **Properties of Asparagus Virus II, a New Member of the Ilarvirus Group** ..... I. Uyeda and G. I. Mink

1281-1285 **Association of *Pseudomonas syringae* pv. *syringae* With a Leaf Spot Disease of Tomato Transplants in Southern Georgia** ... J. B. Jones, S. M. McCarter, and R. D. Gitaitis

1303-1306 **Isolation, Culture, and Pathogenicity to Sudan Grass of a Corynebacterium Associated with Ratoon Stunting of Sugarcane and with Bermuda Grass** ..... C. H. Liao and T. A. Chen

### CYTOLOGY AND HISTOLOGY

1272-1281 **Ultrastructure of Lesions Produced in Leaves of *Beta vulgaris* by Cercosporin, a Toxin from *Cercospora beticola*** ..... M. P. Steinkamp, S. S. Martin, L. L. Hoefert, and E. G. Ruppel

### ECOLOGY AND EPIDEMIOLOGY

1251-1256 **Effects of Fungal Communities on the Pathogenic and Saprophytic Activities of *Fusarium oxysporum* f. sp. *radicis-lycopersici*** ..... J. J. Marois and D. J. Mitchell

1257-1260 **Biological Control of Fusarium Crown Rot of Tomato Under Field Conditions** ..... J. J. Marois, D. J. Mitchell, and R. M. Sonoda

1269-1272 **Further Evidence for the Association of *Polymyxa graminis* with the Transmission of Wheat Spindle Streak Mosaic Virus** ..... B. L. Nolt, C. P. Romaine, S. H. Smith, and H. Cole, Jr.

1285-1289 **Effect of Soil Flooding and Paddy Rice Culture on the Survival of *Verticillium dahliae* and Incidence of Verticillium Wilt in Cotton** .... G. S. Pullman and J. E. DeVay

1289-1293 **A Bacterial Leaf Spot Caused in Yam Bean by *Pseudomonas syringae* pv. *phaseolicola*** ..... R. G. Birch, A. M. Alvarez and S. S. Patil

1293-1296 **Effects of Soil Moisture, Temperature, and Field Environment on Survival of *Sclerotium rolfsii* in Alabama and North Carolina** ..... M. K. Beute and R. Rodríguez-Kabana

1297-1302 **Inoculum Pattern, Inoculum Density-Disease Incidence Relationships, and Population Fluctuations of *Cylindrocladium crotalariae* Microsclerotia in Peanut Field Soil** ..... J. D. Taylor, G. J. Griffin, and K. H. Garren

## RESISTANCE

1235-1238 **Correlation of Medicarpin Production With Resistance to *Phytophthora megasperma* f. sp. in Alfalfa Seedlings** ..... A. Vaziri, N. T. Keen, and D. C. Erwin

1245-1247 **Genotypic Differences in Maize to Kernel Infection by *Fusarium moniliforme*** ..... S. B. King and G. E. Scott

1248-1251 **Decay Resistance of Red Pine Wood Chips Enriched with Oleoresin** ..... W. E. Eslyn and K. E. Wolter

1315-1318 **The Residual Effects of Some "Defeated" Powdery Mildew Resistance Genes in Isolines of Winter Wheat** ..... H. A. Nass, W. L. Pedersen, D. R. MacKenzie, and R. R. Nelson

## DISEASE CONTROL AND PEST MANAGEMENT

1261-1263 **Growth of *Ceratocystis ulmi* on Low Concentrations of Hydrochloride and Phosphate Salts of Methyl 2-Benzimidazolecarbamate on Thiabendazole Hypophosphite** ..... L. R. Schreiber and G. F. Gregory

## TECHNIQUES

1232-1234 **Maintaining *Bremia lactucae* on Washed Seedlings of *Lactuca sativa* in Deep Petri Dishes** ..... J. E. Yuen and J. W. Lorbeer

1242-1244 **Serological Assays for Oat Blue Dwarf Virus** ..... E. E. Banttari

## GENETICS

1307-1310 **Effect of Host Genotype on Multiplication of *Pseudomonas phaseolicola*** .. S. J. Stadt and A. W. Saettler

1310-1315 **Genetic Control of Symptoms, Movement, and Virus Accumulation in Cowpea Plants Infected with Cowpea Chlorotic Mottle Virus** ..... C. W. Kuhn, S. D. Wyatt, and B. B. Brantley

i **Tables of Contents for 1981**

*I* **Index for 1981**

**Statement of Ownership, Management, and Circulation**

# INDEX FOR VOLUME 71

AUTHOR AND SUBJECT INDEX. Page numbers of illustrations are in parentheses. Pages of errata are in italics.

*Alternaria* spp.
  on asparagus, fertilizer effect, 1006
  on blueberry, postharvest decay from, 220
  on marigold, new blight, 904
  *alternantherae*, on alligatorweed, biocontrol measure, 210
  *alternata*
    on corn, epidemiology, 262
    host-specific toxin of, enzyme specific role, 240
    on persimmon, etiology and histology, 1124–1126
    on tomato, host-specific toxin from, 858
    on white bean, pod and seed coat discoloration by, 909
  *helianthi*
    on sunflower
      in Ohio, 880
      seedling blight, 1115
  *macrospora*, Anoda weed controlled by, 865
  *porri*, on onion, age and leaf position relation, 895
  *solani*, on tomato, disease assessment with image analysis, 890
  *tenuissima*, on soybean, seed quality and beetle association, 1117
*Alternenthera philoxeroides*, *Alternaria* for control, 210
Altman, J., 199, 857
Aluisio, A. L., 445
Alvarez, A. M., 203, 236, 269, 274, 1002, 1289
Alves de Lima, M. M., 199
Amador, J. M., 857, 895
Amin, K. S., 20
Ammon, V., 903
Amos, D. F., 772
*Amsinckia intermedia*, X-disease of, plant age effect, 876
Amundson, R. G., 564
Anagnostakis, S. L., 199, 559, 1198
*Ananas comosus* (see Pineapple)
Anderegg, J., 1196
Andersen, J. L., 857
Anderson, A. J., 1002
Anderson, J. D., 769
Anderson, J. S., 199
Anderson, N. A., 225, 254, 1118
Anderson, R. L., 882
Andres, M. W., 198
Andrews, J. H., 200, 224, 857
Andrews, M. W., 857
*Anguina agrostis*, neurotoxin produced by, 259
*Anisogramma anomala*
  on filbert
    inoculum dispersal of, 220
    predictive models for, 220
Anjos, J. R. N., 435
*Anoda cristata*, *Alternaria macrospora* for biocontrol, 865
Antle, C. E., 685
Antonius, S. H., 857
Anzalone, L., Jr., 200, 857
Anzola, D., 308
*Aphanomyces* sp.
  on bean, temperature effect, 899
  oospore of, tetrazolium bromide for detection, 907
  on pea, sludge compost effect, 238
  on snap bean, root and stem rot from, 250
  *euteiches*
    ecology of, technique for study, 282
    on pea, inoculum density estimation in soil, 1169
*Aphelenchoides* spp., on peach, Cytospora canker association, 770
  *besseyi*, on rice, factors affecting, 240
*Aphelenchus avenae*, non-pathogenicity of, 858
Aphid
  sensory pegs on labia of, morphology, 879
  vectors for viruses, anesthesia of, 203
*Apium graveolens* (see Celery)
Appie, A. E., 164, 875
Apple, J. D., 857
Apple, R. E., 860
Apple
  *Botryosphaeria dothidea* on, histopathology, 375, (376–378)
  calyx-end rot of, fungus association, 557
  epiphytic organisms in canopy, 200
  *Erwinia amylovora* on
    vascular transport in, $^{32}$P-labeled, 656
    xylem parenchyma plasmolysis, 844, (846–851)
  fungicide residue bioassay technique for, 557
  *Glomerella cingulata* on, germination, appressorium formation, and infection of, 454, (457)
  *Glomus* spp. on, phosphorus and arsenic effect on growth, 106
  hairy root of, in seedlings, 107
  organisms on leaves and buds of, 200
  *Penicillium* on, patulin produced by, 207
  pesticide deposition and distribution on, 262
  *Phytophthora cactorum* on, composted hardwood bark effect on, 256
  *Physalospora obtusa* and *Botryosphaeria dothidea* on, 584
  *Podosphaera leucotricha* on, effect on photosynthesis, transpiration, and carbohydrate, 392
  postharvest calcium treatments for, 868
  postharvest pathogens on, recovery of, 210
  powdery mildew of
    fungicide effect on disease severity, 947
    fungicide testing for, 769
  replant disease of
    etiology, 228
    histology, 865
    incidence in Maine, 208
    rhizosphere as inoculum source, 562
  Ridomil use on, uptake and translocation by trees, 872
  scab of
    fungicides for, 230
    triazole for postinfection control, 737, (740, 741)
  *Venturia inaequalis* on
    ascospore maturity model evaluated in North Carolina, 1030
    benomyl-resistant strains, 529
  vesicular arbuscular mycorrhizae growth effect on, 712
Apple chlorotic leaf spot virus, detection by electron microscopy, 400, (401, 402)
Apple mosaic virus, on rose, detection by ELISA, 767
Apricot, jacket rot or green rot of, pathogens, 110
Arabis mosaic virus, characterization and purification, 223
Aragaki, M., 1008
*Arceuthobium* spp., host reaction to, cytokinin role, 902
  *pusillum*
    on black spruce
      microcomputer for evaluation, 858
      in Newfoundland, 255
      spread and mortality, 201

*Arctostaphylos densiflora*, copper deficiency in, 1007
Arias, J. A., 857
Arigoni, D., 892
Armentrout, V. N., 109, 858, 896
*Armillaria mellea*
  ethanol effect on, 565
  gallic acid effect on, 565
  rhizomorph production in, guaiacol effect on, 237
*Armoracia rusticana* (see Horseradish)
Armstrong, G. M., 474
Armstrong, J. K., 474
Arny, C. J., 1002
Arny, D. C., 225, 237, 858, 881, 890
*Ascochyta pteridium*
  on bracken fern
    biocontrol agent, 911
    disease assessment with image analysis, 890
Ash
  ozone and $SO_2$ tolerance in, 804
  tobacco ringspot virus and tobacco mosaic virus on, in New York, 558
Ashworth, L. J., Jr., 200, 1002
Asparagus
  Fusarium crown rot of
    biological management, 212
    inoculum source, 218
  *Fusarium* spp. on fruit and seed of, aerial contamination, 560
  Fusarium stem rot of, fly relation, 218
Asparagus virus II, properties of, new ilarvirus member, 1264, (1267)
Aspen, Cryptosphaeria canker and Libertella decay, 1137, (1138, 1141, 1142)
*Aspergillus*
  *flavus*
    on corn
      aflatoxin production and infection, factors affecting, 810
      kernel resistant to, 231
      silk age and temperature effect, 898
    on corn silk, 893
    on cotton, aflatoxin of bolls of, 889
  *ochraceus*, biocontrol of Fusarium crown rot of tomato, 1251, 1257
Aster yellows, culture maintenance of, 819, (820)
Atilano, R. A., 858
Atkinson, M. M., 200
Averre, C. W., 896
Avocado
  double stranded RNA in, detection, 884
  metalaxyl translocation in, 509
  Phytophthora root rot of, soil temperature effect, 925, (926)
  sunblotch disease of, transmission with purified RNA, 909
Axelrood-McCarthy, P. E., 825
Ayers, J. E., 221, 354, 379, 560, 561, 835
Ayers, W. A., 90, 764
Azar, M., 858

Babu, J. R., 557
*Bacillus*
  *licheniformis*, biocontrol agent for barley net blotch, 902
  *megaterium*, on wheat, white blotch from, 226
  *subtilis*
    bean rust controlled by, 711
    *Sclerotium cepivorum* on onion controlled by, 262
Backman, P. A., 198, 200
Backus, E. A., 1067
Bacteria
  epiphytic populations of, lognormal distribution, 225
  Gram differentiation of, rapid method, 907
  pathogenic, pili of, 906
  plant-growth promoting, antibiosis by, factors, 891
Bacteriophage
  in *Xanthomonas campestris*, characterization, 269, (272)
  *Xanthomonas fragariae*, characterization, 767
Bailey, J. E., 200, 201
Bajet, N. B., 201

Barksdale, T. H., 764
Bar-Lev, S., 880
Barley
  common root rot of, in Utah, 106
  disease detection by infrared photography, 867
  *Fusarium roseum* on, toxic components of, 235
  net blotch of
    biocontrol agent, 902
    resistance to, technique, 1117
  powdery mildew of
    defense reaction effect on yield and quality, 396, (397)
    incompatibility and *Mla* gene, cytoplasmic streaming, 1062, (1065)
    rapid staining technique, 596, (597)
  *Septoria nodorum* on, wheat isolates compared to, 593
  soil fumigation of, yield response, 560
Barley stripe mosaic virus
  antiviral compounds assayed for, 895
  on corn, temperature effect, 823
  genomic and messenger RNAs of, analysis, 894
  protein synthesis in host, 221
  seed transmission of, resistance to, 865
Barley yellow dwarf virus
  in cereal cultivars, comparative virus content, 904
  cereal root response to, mist culture system, 229
  on corn, in Washington, 863
  oats tolerant to, 210
  purification and antiserum production, 871
  strain identification by aphid and assay, 267
  strains in Washington, 108
  vector nonspecific isolate of, purification, 213

Beale, M. A., 561
Bean, G. A., 767, 768, 769
Bean
  dry-, *Heterodera glycines* on, growth effect, 198
  *Rhizoctonia* of, Trifluralin effect, 199
  root rot of, sampling pattern for determination, 887
  root rot potential in, determination in Wisconsin soil, 887
  snap-, root rot of, cultural practice effect, 254
  yield of, soil fungus effect on, 255
Bean common mosaic virus, strains of, resistance to, 1007
Bean golden mosaic virus
  composition and genome structure, 222
  DNA from, mesophyll protoplasts infected by, 201
  virus titer and DNA component ratio effect, 80
Bean mild mosaic virus, spread in greenhouse, soil relation, 223
Bean necrotic yellow vein virus, purification and properties, 773, (775)
Bean pod mottle virus
  on soybean
    callus protoplast infection, 236
    plant height effect and symptom, 913
Bean yellow mosaic virus
  on arrowleaf clover, relation to *Phytophthora*, 900
  capsid proteins of, peptide map analysis, 859
  clover yellow vein virus hybridized with, 901
  on *Gibasis geniculata*, 768
  in red clover, new strain, 871

Biggs, A. R., 558, 860
Biological control
  *Agrobacterium radiobacter* for crown gall of boysenberry, 107
  *Alternaria alternantherae* for alligatorweed, 210
  *Alternaria macrospora* for *Anoda cristata*, 865
  *Ascochyta pteridium* for bracken fern, 911
  *Bacillus licheniformis* for *Pyrenophora teres* on barley, 902
  *Bacillus subtilis* for
    bean rust, 771
    *Sclerotium cepivorum* on onion, 262
  bacterial antagonists for foliar disease control, formulation, 905
  biocontrol agent survival in soil, 1003
  Cercosporidium leafspot of peanut by *Hansfordia*, 260
  Collembola in cotton rhizosphere, effect on *Rhizoctonia*, 869
  fire blight, bacteriocin preparations, 859
  *Gliocladium virens* for
    *Pythium* and *Rhizoctonia* on cotton, 226
    *Rhizoctonia solani*, 262
  *Hansfordia* for *Fulvia fulvum* on tomato, potential, 908
  *Laccaria laccata* for root rot control of Douglas-fir, 260
  *Penicillium* for pea root diseases, 929, (930–932)
  *Penicillium funiculosum* for Fusarium crown rot of tomato, 1251, 1257
  *Penicillium oxalicum* as seed treatment on pea, 265, 266
  phylloplane microbes to *Venturia inaequalis*, 857
  *Phytophthora palmivora* for milkweed vine, 913
  pseudomonad and *Gaeumannomyces graminis* on wheat, 105
  *Pseudomonas solanacearum* for tobacco Granville wilt, bacteriocins, 866
  *Puccinia obtegens* to Canada thistle, 262
  rhizobacteria used in potato and radish growth, 642
  rush skeleton weed, 356
  rush skeleton weed, epidemiology, 839
  rust for Pontederiaceae, 1203
  *Sclerotium rolfsii* on turf in California, 251
  *Scytalidium uredinicola* on *Cronartium quercuum*, 186
  *Sporidesmium sclerotivorum*
    for sclerotial fungi, 90
    on *Sclerotinia*, 764
  *Streptomyces* spp. for *Rhizoctonia* and *Phytophthora*, 252
  suppressive soil, detection method, 886
  *Trichoderma hamatum*

for pea and radish seedling blight, 569
to *Rhizoctonia solani*, in suppressive soil, 286
*Trichoderma harzianum*
for *Fomes connatus* on red maple, 496
as seed treatment in corn and wheat, 265
*Bipolaris* spp.
on corn, phenolic relation, 224
on wild rice
resistance to fungicides, 230
ten fungicides for, 249
*maydis*
on corn, sporulation and leaf leachates, 224
on corn inbreds, genetics, 883
growth, sporulation, and xylanase production by, 875
heterokaryon incompatibility in, 889
*sorokiniana*, mutants of, characterization of, 223

Cauliflower mosaic virus
DNA from, properties, 226
inclusion bodies of, major protein, 217
phosphorylated proteins in, 222
Celery
Fusarium yellows of, factors affecting, 77
Septoria leaf blight of, resistance to, 234
Septoria leafspot of, fungicides for, 107
*Cephalosporium acremonium*, on corn kernels, infection time, 796
Ceponis, M. J., 208, 220, 253, 261
*Ceratobasidium stevensii*, on apples and ornamentals in Kentucky, 1004
*Ceratocystis*
*fagacearum*
on oak, methyl bromide eradication of, 903
survival in South Carolina, 908
tree temperature effect on, 236
*fimbriata*, on sycamore, microorganisms associated with, 240
*paradoxa*, on sugarcane, fungicide for, 210
*ulmi*
culture filtrate effect on elm seedlings, 768
on elm
buried infections of, 207
electrical resistance and water potential, 563
epidemic parameters, 716
microflora antagonistic to, 905
recovery technique, 564
spore movement in, 765
vessel morphology change, 256
growth on benzimidazols, 1261
isolates of, inheritance of crosses, transpiration affected by, 219
*Pseudomonas syringae* antagonistic to, 1006
selective medium for, 242
on white elm, cerato-ulmin produced in, 260
*Cercospora* spp.
cercosporin from, toxin, 213
cercosporin produced by, tobacco cell membranes destroyed by, 869
on *Leonurus sibiricus*, new spp., 1115
on peanut, forecasting system, 214
on soybean, assay method for, 267

*apii*, on celery, epidemic parameters, 716
*arachidicola*
disease progress of, 917
germination and sporulation, temperature effect, 876
on peanut
control, 903
distribution and severity in Florida, 324
sampling and distribution, 905
*asparagi*, on asparagus, fertilizer effect, 1006
*beticola*
cercosporin produced by, lesion ultrastructure, 1272, (1275–1278)
on sugar beet, race C2, histopathology, 633, (634–637)
*kikuchii*, on soybean, isolation substrate, 251
*penniseti*, on pearl millet, near-isogenic populations to study effect, 331
*sojina*
on soybean
infection related to development, 899
race 5 in Georgia, 250
resistance to race 5, U.S. threat, 334, (335)
spore harvesting from culture, 914
*zea maydis*
on corn
penetration and infection, 202
progression dynamics of, 859
weather and maturity factors, 901
*Cercosporidium personatum*
on peanut
control, 903
distribution and severity in Florida, 324
*Hansfordia* for biocontrol, 260
resistance to, 787
sampling and distribution, 905
Cerkauskas, R. F., 1115
*Ceuthospora lunata*, on cranberry, wounding and wet raking effect on, 253
*Chaetosiphon jacobi*, virus replication in, 598, (600, 601)

Ciegler, A., 867, 889
Cigna, J. A., 1238
*Cinnamomum camphora, Verticillium dahliae* on, fungicides for, 109
*Circulifer tenellus*
spiroplasma vector, 856
X-disease agent, 900
Cirulli, M., 50
*Citrullus vulgaris* (see Watermelon)
Citrus
blight of
sharpshooters as vectors, 235
tetracycline for, 261
xylem affected by, 205
dry root rot of, disease complex, 242
*Fusarium solani* on roots of, toxin production, 951
mycorrhizae on, carbohydrate status of, 245
*Penicillium* spp. on, benzimidazole tolerance, 482
*Penicillium italicum* on, polygalacturonase from infected fruit, 328
Phytophthora root rot of, drip and furrow irrigation effects, 216
tetracycline for, pressure injection, 880
virus-*Glomus etunicatus* interaction, 897
Citrus exocortis viroid, on *Gynura aurantiaca*, root patterns, 964, (965)
Citrus tristeza virus
detection with radioimmunosorbent assay and ELISA, 889
gradient centrifugation of, 875
preparation and stability of, 218
purification of, RNA size estimation, 878
purification procedure for, 235
resistance to, ELISA for measure, 875
Ciuffetti, L. M., 867
Civerolo, E. L., 767, 882
*Cladosporium*
*cladosporoides*, on cucumber, Benlate for control, 212
*fulvum*, on tomato, glycoprotein toxin from, 561
Claflin, L. W., 215, 262
Clark, C. A., 208, 708, 908
Clark, R. K., 913

Clement, D., 891
Cleveland, T. E., 867, 904, 1212
Cline, M. N., 209, 867
Cline, S., 209, 867
Clover
ladino-, root rot of
*Codinaea* and *Fusarium* spp., 865
*Codinaea fertilis* induced, 207
*Phytophthora* spp. on, host range and specificity, 276, (277, 278)
red-, Myrothecium root rot of, 235
Clover yellow mosaic virus
polar assembly of, 198
on *Trifolium* spp., cell suspension culture, 116
Clover yellow vein virus
capsid proteins in, peptide map analysis of, 859
ELISA for, time and temperature effect, 241
on *Trifolium* spp., cell suspension cultures, 116
in yellow mosaic virus hybridized with, 901
Coakley, S. M., 209, 461
Cobb, F. W., Jr., 879
*Coccomyces hiemalis*
on cherry, infection period model, 214
on sour cherry
infection period detection, model, 728
leaf age and inoculum concentration, 872
*Cochliobolus* spp., fungistasis in, annulment of, bioassay, 215
*carbonum*
on corn, resistance to race 3, 560
parasitic fitness in isolates of race 3, 561
*sativus*
on barley, resistance to, 1115
on wheat and barley, subcrown internode infection, 263
on wheat seeding depth and rate effect, 909
*victoriae*, virulence attenuation of, 1115
Coconut, tinangaja and bristle top, relation to cadang-cadang disease, 1104, (1105, 1106)
*Codinaea fertilis*
on clover, root rot induced by, 207
on ladino clover, root rot, 865
Cody, R. M., 258, 906
Coffee, rust of, in Latin America, symposium, 968
Coffman, W. R., 263, 608

Cole, R. H., 560
*Coleosporium solidaginis*, in wastewater irrigation area, 215
*Colladonus montanus*
cherry buckskin vector, 105
vector for spiroplasma, 108
X-disease transmitted by, on sugar beets, 900
Collembola, in cotton rhizosphere, biocontrol potential, 869
*Colletotrichum*
*acutatum*, on pine, histopathology, 777, (778–781)
*capsici*, on cotton, histological effects, 252
*coccodes*
demethylmedicarpin produced by, 800
phytoalexin conversion by, 225
on potato
early dying complex, 243
pathogen interaction, 232
temperature effect, 249
on tomato, latent infections of, 234
weed hosts of, 564
*dematium*, on soybean, yield loss from, 200
*gloeosporioides*
on blueberry, epidemiology, 449, (452)
on papaya
cutinolytic enzyme from, purification, 870
histology, 1002
*graminicola*
on corn, inheritance of resistance, 488, 1190
on corn inbreds, genetics, 883
*lagenarium*
on cucumber
protein related to resistance, 218
relation to other diseases, 203
on watermelon, thiophanate effect on epidemic and yield, 20
*trifolii*
on alfalfa
race identification and host resistance, 247
race mixture effect, 770
hosts for, 264
toxic polysaccharide produced by, characterization of, 217

Cofio Da Luz, W., 211
*Coriolus versicolor*, hardwood extractives inhibit decay from, 521
Corn
aflatoxin production in, resistance to, screening method, 888
Alternaria leaf blight of, epidemiology, 262
anthracnose and Diplodia stalk rot of, losses from, 1117
anthracnose leaf blight of, inheritance of resistance, 488
*Aspergillus flavus* on
aflatoxin and infection, factors affecting, 810
silk of, 893
bacterial disease of, carbofuran effect, 767
barley stripe mosaic and wheat streak mosaic viruses on, temperature effect, 823

competition effect on yield, 1118
*Corynebacterium nebraskense* on, $SO_2$ effect on lesions, 445
downy mildew of, ultrastructure, 1133, (1135, 1136)
ear rot resistance in, technique for evaluating, 911
electrolyte leakage from, stress and leaf blight effect, 1116
fungal pathogens of, ribosomal proteins in, 248
*Fusarium moniliforme* on
kernels of, genotypic differences, 1245
on seedlings of, 1196
seedling and stalk rot relation, 229
*Fusarium moniliforme* and *Cephalosporium acremonium* on kernels of, 796
*Fusarium* on, relation to esophageal cancer, 792
*Gibberella zeae* on, mycotoxin produced by, 1118
*Glomus* spp. on, phosphorus and arsenic effect, 106
gray leaf spot of, weather and maturity effect, 901
*Helminthosporium maydis* race T on
isolate and parasitic fitness, 354
parasitic fitness, 351
histopathology of *Fusarium* infections, 379, (380, 382–384)
Maize Rio Cuarto disease of, in Argentina, 205
male sterility in, protein association, 260
mesocotyl of, phenolics redirected in following inoculation, 224
microflora on ears of, 880
nematicide efficacy of, in Kansas, 236
*Penicillium* spp. on ears of, pathogenicity, 175, (176)
Philippine downy mildew of, temperature effects, 765
*Pseudomonas alboprecipitans* on, infection and establishment, 171, (172, 173)
*Puccinia sorghi* on, resistance gene transfer from *Tripsacum*, 518
seedborne fungi in, screening for, 874
sorghum downy mildew on, 252
southern corn leaf blight in, system for epidemiology, 875
stalk rot of
crop management practice affecting, 907
inheritance of resistance to, 1190
nitrogen and nitrification inhibitor effect on, 882
water stress factor, 253
sweet-, ozone sensitivity in, 770
toxin relation to pathogenicity, 875
vasicular-arbuscular mycorrhizae of
crop practice effect, 221
effect on growth of, 712
wheat streak mosaic virus relation, 217
wheat striate mosaic virus on, in South Dakota, 229
zearalenone contamination of, host genotype effect, 211
Corsini, D., 1003
*Corynebacterium*
*insidiosum*, on alfalfa, *Fusarium oxysporum* relation, 228
*michiganense*
bacteriocin from, purification and characterization, 227
on tomato, differential response, 214
on wheat, distribution and hosts, 207
*nebraskense*
bacteriophage characteristics infecting, 903
on corn, $SO_2$ effect on lesion expansion, 445
growth requirements and nutrition, 865
*rathayi*, neurotoxin produced by, 259
*sepedonicum*, on potato, symptoms and population, 861
*Corynespora cassiicola*, on soybean, *Phialophora* interaction, 908
Costa, C. L., 890
Costonis, A. C., 559
Cotter, H. V. T., 861
Cotton
aflatoxin level in seed of, harvest method effect, 359, (360)

*comandrae*
on *Pinus divaricata*
colonization of tissue, 202
haustorial development, 203
*quercuum*
basidiospores of, diurnal periodicity, in Florida, 264
on loblolly pine, acid rain effect on, 864
parasitized by *Scytalidium uredinicola*, 186
in pine plantation, seasonal weather effect, 905
on pines
pith necrosis in seedlings, 911
resistance to, 900
resistance to, symposium, 993
sporulation, 345
sporulation and parasite interaction, 348
on red oak, biology, 898
on slash pine
interactions, 1090
resistance selections, 882
seedling resistance to, 221
on southern pines, auxin relation, 903
spermatial formation in, factors, 233
*ribicola*
axenic culture of, virulence, 214
on sugar pine, resistance mechanism, 386
*Tuberculina maxima* for control, symposium, 997
Crop loss
estimates of, information need, 109
model for, 685
prediction of, models, 108
Crop loss model, evaluaton of, 239
Crop management, biological seed treatment use, in corn and wheat, 265
Crucifer, clubroot of, lime effect, 1003, 1005
*Cryptosphaeria populina*, on aspen, canker from, 1137, (1138, 1141, 1142)
Csinos, A., 912
Cucumber
bacterial wilt and gummy stem blight of, systemic resistance in, 203
Cladosporium rot of, Benlate for control, 212
host protein related to resistance, 218
in hydroponic systems, chlorine for root pathogens, 883
virus-like infection from mildews and rust, 267
wildfire toxicity in, 870
Cucumber mosaic virus
in cucumber, systemic resistance, 860
detection by immunodiffusion test, 1221
genetic analysis of, 872
on *Phaseolus*, seed transmission, RNA recombinants as probes of, 213
tomato white leaf caused by, 876
*Cucurbita foetidissima*, squash mosaic virus on, 252
Cucurbits
fungus disease of, new, 902
gummy stem blight of, insect and powdery mildew relation, 860

iprodione, effect on *Sclerotinia sclerotiorum* mycelium, 722
metalaxyl
for hop downy mildew, 1005
*Peronospora tabacina* strains of, 558, 914
*Phytophthora capsici* affected by, 123, (128)
Phytophthora root rot controlled by, 864
systemic translocation in tomato, avocado, and *Persea indica*, 509
for taro soft rot control, 897
tobacco blue mold controlled by, 897
pentachloronitrobenzene, effect on potato soil-borne fungi, 557
procymidone, *Sclerotinia minor* tolerant to, 899
Ridomil
cucurbit downy mildew resistant to, 251
Phytophthora rot of soybean controlled by, 234
potato late blight controlled by, 214
use for lettuce big vein, 106
thiabendazole
distribution in elm, pressure effect, 560
effect on potato soil-borne fungi, 557
on soybean, rainfall effect, 864
thiophanate, effect on watermelon anthracnose epidemic and yield, 20
triadimefon
mycorrhizae on pine affected by, 230
pearl millet rust controlled by, 912
triazole, apple scab postinfection control, 737, (740,741)
tricyclazole, for rice blast control, 206
Vangard, sugarcane smut controlled by, 868
vinclozolin, for lettuce drop, 562
Fungistasis
annulment of, bioassay method, 215
fungal propagule exudates of, relation, 216
fungal propagules and ammonia treatment, 1116
Furniss, M. M., 551
*Fusarium* spp.
on corn, relation to esophageal cancer, 792
culture preservation of, 216
in grassland soil, medium and method effect, 241
on ladino clover, competition with *Codinaea fertilis*, 865
lignin and aromatic acids degraded by, 907
on potato, early dying complex, 243
in soil, microwave oven treatment for, 873
on soybeans, seed and tissue colonization by, 693
on sugar beet root surfaces, bacterial relation, 259
on watermelon seed, 894
*moniliforme*
on asparagus
dissemination of, 560
inoculum source, 218
miner fly relation, 218
on corn
cropping practices affecting, 907
kernel infection, 1245
removal method, 215
serological method for detecting, 239
stalk rot caused by, factors, 215
water stress as early season factor, 253
on corn kernels, infection time, 796
on corn seed and seedlings, 1196
on corn seedlings and stalks, relation, 229
ribosomal proteins of, antibodies against, 248
on slash pine, relation to deodar weevil, 861
on sorghum, kernel histopathology, 208
on sweet corn, histopathology of seed infection, 379, (380, 382–384)
*moniliforme subglutinans*
on pineapple
epiphytic populations in Brazil, 214
pathogenicity of, 1145, (1147)
on pine seedlings
histopathology, 858
mortality in Florida, 204
on *Plantago lanceolata*, infection pattern, 895
*oxysporum*
on alfalfa, resistance and moisture relation, 766
on asparagus
biological management of, 212
dissemination, 560
inoculum source, 218
miner fly relation, 218
on celery
factors affecting disease, 77
nitrate and potassium effect, 903
on chrysanthemum
night temperature effect on, 239
symptoms and colonization of, 874
on cotton, root colonization, 876
on Douglas-fir, *Laccaria laccata* effect against, 260
ecology of, technique for study, 282
on lentil, root rot from, 203
on melon, sludge compost effect, 238
on soybean, resistance screening, 769
on sugar pine, hypocotyl rot in nurseries, 864
on sweet corn, histopathology of infection, 379, (380, 382–384)
on tomato
factors affecting, 856
fungitoxic substances from, 104
mycorrhizal relation, 894
resistance related to ethanol, 213
soil fungi effect on survival, 239
on tree roots, injury from, 911
on watermelon, resistance sources, 869
on white bean, yield effect, 255
*oxysporum apii*
on celery, inoculum density effect, 264
race classification of, 474
race of, new in California, 108
saprophytic ability of, 246
*oxysporum chrysanthemi*
on chrysanthemum
anatomy, 1162, (1163, 1164, 1166, 1167)
histopathology, 1043, (1045–1048)
leaf histopathology, 1152, (1153, 1154)
*oxysporum citri*, host range and distribution of, 261
*oxysporum cucumerinum*, cucumber seedling evaluation of, 247
*oxysporum lini*, suppression in soil, mechanism, 232
*oxysporum lycopersici*, on tomato, nematode effect on resistance, 254
*oxysporum medicaginis*, on alfalfa, *Corynebacterium* relation, 228
*oxysporum melonis*, survival in soil, factors affecting, 768
*oxysporum radicis-lycopersici*
on tomato
biocontrol and ecology, 1251, 1257
factors affecting, 167
*roseum*
on barley, toxic components, 235
chlamydospores of, morphology and survival of, 85, (87)
on corn, toxin production, 258
on legumes, pathogenicity, 906
on red clover
isolate comparison, 258
root wounding effect, 564
reproduction and spore germination in, water potential effect, 499
vomitoxin and zearalenone produced by, 910
on wheat, soil matric potential effect, 253
*roseum graminearum*, ribosomal proteins of, antibodies against, 248
*roseum* and *solani*, on potato, resistance to, 623
*semitectum*, on cottonseed, 867
*solani*
on bean
dynamics of, 105
kievitone and phaseollidin detoxification, 904
*Pythium* related to, 564
on citrus, toxin production, 951
on *Dieffenbachia*, symptoms, 866
on pea, host-parasite relation, 756
on soybean, relation to mycorrhizae and *Rhizobium*, 267
strain of, use in biocontrol, 862
on sweet potato, stem and root rot from, 896
*solani phaseoli*
on bean
factors affecting, 771
herbicide effect on, 857
integrated control of, 103
kievitone hydratase from, characterization, 867
phytoalexins from, detoxification, 1212
on white bean, yield effect, 255
*solani pisi*, on chickpea, phytoalexin tolerance in, 213
*sporotrichioides*, on watermilfoil, 200
*tricinctum*
on corn and rice, T-2 toxin production by, 212
on wheat, 910
*Fusicladium effusum*
juglone effect on, 913
on pecan
conidial discharge pattern, 877
scab development, 888

Gaard, G. R., 213
Gabriel, D. W., 217, 875
Gabrielson, R. L., 103, 217, 870, 1003
Gadoury, D. M., 560
*Gaeumannomyces*
*graminis*
nutrient effect, 108
suppression in soil, mechanism, 232
on turfgrass, in Maryland, 766
on wheat
decline not from virulence loss, 211
edaphic factors, 223
interaction with pseudomonads, 105
pseudomonad for control, 1007, 1008
rotation effect on, 189
*graminis tritici*
pseudomonad effect on, 264
soil and inoculum concentration effect, 265
on wheat, displacement by *Microdochium bolleyi*, 861
Galindo, J. J., 875
*Galleria mellonella*, spiroplasma cultivated on larvae of, 408
Gálvez, G., 875
Galway, D. A., 867
*Ganoderma lucidum*, on oak, drought relation, 890
Gantz, D., 853

spore germination, 577
virulence genes in, 208
rust resistance, 768
$SO_2$ injury to, soil moisture effect, 1208
Phatak, S. C., 259, 860, 899
*Phellinus pini*, on conifers, discoloration measured, 861
*Phialophora*
*gregata*
on soybean
*Corynespora* interaction, 908
fungicide for, 215
relation to brown stem rot, 233
water stess effect, 247
*melinii*, on red maple, biocontrol for, 496
Philbrik, H. D., 565
Phillips, D. J., 1006
Phillips, D. V., 250, 334, 899
Phillips, N. J., 910
*Philodendron* spp., *Erwinia chrysanthemi* on, 23, (24)
Phipps, P. M., 764, 767, 770, 899
*Phlebia chrysocrea*, on oak, decay from, 203
*Phoma*
*betae*
on sugarbeet
rot and sucrose yield affected by, 206
seed infection and sucrose yield, 357
*lingam*, on cabbage, strains and epidemic role, 103
*Phomopsis* spp.
on grape, control, 869
on legume seedlings, hosts of, 768
on soybean
assay method for, 267
environment, fertility, and cultivar effect on, 1027
inoculum source of, 218
on soybean seeds, control, 914
*elaeagni*, on Russian-olive, 892
*sojae*
on soybean
seasonal sporulation significance, 768
sporulation on stems, 887
*Phyllachora graminis*, in wastewater irrigation area, 215
*Phymatotrichum omnivorum*
on cotton, water relations, 1006
pathogenicity and strands of, 198
strand ontogeny in, 199
*Physalospora obtusa*, on apple, spore production and dispersal, 584
Physiology of disease, nutrient uptake in rust fungi, symposium, 983, (985–987)
Phytoalexin
in cotton, specialized cells for, 238
elicitors of, soybean protection against *Phytophthora*, 866
*Fusarium solani phaseoli*, detoxification, 1212
glyceollin, on soybean with Phytophthora rot, 234
kievitone, pectic enzyme inhibition by, 206
medicarpin
conversion by *Colletotrichum coccodes*, 225, 800
*Fusarium solani pisi* relation, 213
in *Phytophthora*-infected alfalfa, 1235
*Phytophthora parasitica* on tobacco callus, 208
*Phytophthora parasitica* origin, in tobacco callus, 864
pisatin, *Nectria* on pea affected by, 260
*Phytocoptella avellanae*, on filbert, relation to canker, 220
*Phytophthora* spp.
acylalanine-type fungicides resistant to, 558
on alfalfa and clover, host range and specificity, 276
on cherry, resistance to, 243
on clover, relation to bean yellow mosaic virus, 900
interspecific crosses between related spp. of, 60
on milkweed vine, 215
oospores of, tetrazolium for detection, 907
on pepper, sludge compost effect, 238
suppression in soil with nitrogenous substances, ammonia and nitrous acid role, 53
*cactorum*
on apple seedlings, composted hardwood bark effect on, 256
oospores of, photobiology, 201
*capsici*
fungitoxicity of captafol and metalaxyl to, 123, (127, 128)
isolation of, selective, in soil, 129, (131)
*P. palmivora* compared to, 262
*cinnamomi*
on *Abies fraseri*, temperature effect on survival, 885
on avocado
temperature effect on, 925, (926)
ultrastructural studies in resistant species, 871
on Fraser fir
metalaxyl effect on, 864
temperature and inoculum density effect, 254
on rhododendron, soil moisture effect on rots, 831, (832)
sporangium production in, soil extract effect on, 231
spread in pine bark potting medium, 772
*citricola*, sporangial formation and oospore germination, light effect, 250
*citrophthora*
from cocoa, in Brazil, 230
efosite aluminum effect on growth and sporulation, 934
*cryptogea*, on cherry, flooding effect, 913
*ilicis*, on English holly, fungicides for, 868
*infestans*
mycelium of, elicitor activity of acids, 861
on potato
epidemic related to host and pathogen genotypes and infection rate, 82
epidemiology analysis by simulation modeling, 612
protectant fungicides for, 164
rate-reducing resistance adaptation, 883
sporangia of, germination and rehydration, 1181
sterol content altered, effect on resistance, 862
on tomato
biomass and sterol content in, 862
disease assessment with image analysis, 890
*megasperma*
on alfalfa
factors affecting, 870
medicarpin and resistance correlation, 1235
resistant screening method, 768
chlamydospores of, soil survival and infective propagule, 202
on Douglas-fir, effect on soybean and alfalfa, 223
on Douglas-fir, soybean, and alfalfa, host specificity, 65
growth and phytoalexin accumulation in, in tissue culture, 895
growth and reproduction of, ion effect, 265
on legumes, cytology of isolate interaction, 243
oospore germination in, 874
pseudomonad relation on alfalfa, 1007
reproduction and growth on medium, 265
on soybean
*Glomus etunicatus* relation, 912
in Maryland, 764
phytoalexin for protection, 866
propagule detection by antibody stains, 867
temperature effect, 911
temperature for race identification, 885
survival in soil, 209
*megasperma sojae*
on soybean
age and glyceollin production effect, 94
electron microscopy of reactions, 617, (618–621)
factors affecting, 263
races isolated from Ohio soil, 226
races of, in hypocotyl, 258
race-specific resistance in, age effect, 504
Ridomil for, 234
seedling test for resistance, 261
*Streptomyces* spp. for control, 252
*palmivora*
in cocoa pods in Brazil, 885
milkweed vine controlled by, field test, 913
*parasitica*
on citrus, systemic fungicides for, 870
drip and furrow irrigation influence, 216
efosite aluminum effect on growth and sporulation, 934
on petunia, fungicides for, 256
on sand pine, new pathogen of, 869
sexuality in, factors, 886
on tobacco, calcium nutrition and susceptibility, 772
on tobacco callus
interaction with bacteria, 242
phytoalexin and histology, 864
on tobacco callus tissue, phytoalexins from, 206
on tomato fruit, irrigation sequence effect, 882
*parasitica nicotianae*
on tobacco, spore number relation to infection, 69
zoospores of, tobacco callus infection by, 213
Pierce's disease
detection in wild plants, 856
ELISA for detection, 107
on grape
in stem, petiole, and leaf vein, 415, (416)
vector preference and inoculation efficiency, 429
xylem affected by, 205
serological relations, 108
Pilowsky, M., 319
Pine
black and Scots, *Leptographium* and beetle complex, 565
decay resistance in, oleoresin effect, 1248
decline and death in Delaware, 764
eastern white-, decline of, factors associated with, 772
fusiform rust of, symposium, 993
loblolly-
fusiform rust of, modelling losses, 896
*Heterobasidion annosum* on, beetle relation, 479
root rot of, incidence and severity, 661
loblolly and slash-, *Cronartium quercuum* on
parasite interaction with sporulation, 348
sporulation by, 345
longleaf-
brown-spot needle blight of, benomyl treatment for, 884
*Rhizoctonia solani* on, losses in nursery, 215
mycorrhizae of, triadimefon effect on, 230
nematode disease of, in Virginia, 765
pinewood nematode on, in Virginia, 772
ponderosa-
blue-stain fungi of, stand characteristics, 237
Lophodermium needlecast of, in North Dakota, 1117
root disease and bark beetle relation, 237
red-, *Sirococcus strobilinus* on, life cycle and control, 246
slash-
Fusarium rust in, host growth effect, 875
fusiform rust of, seedling resistance to, 221
fusiform rust resistant selections, 882

pinewood nematode of, in Louisiana, 203
sugar-, blister rust of, resistance mechanisms, 386
western white-, blister rust management of, 239
wood blocks from, decay inhibition by hardwood extractives, 521
Pineapple
Fusarium fruit rot of, pathogenicity, 1145, (1147)
*Penicillium funiculosum* on, endosulfan for, 1006
*Pinus* spp., *Verticicladiella procera* on, 233
*divaricata*
*Cronartium comandrae* on
haustorial development, 203
primary tissue colonization, 202
*eliottii*, fusiform rust on, interaction, 1090
*radiata*, *Colletotrichum acutatum* on, histopathology, 777, (778–781)
*resinosa*
ectomycorrhizae on, herbicide effect, 247
Scleroderris canker of, pruning effects, 558
*strobus*, wet pockets in, characteristics, 563
Pirone, T. P., 229, 242, 807, 871, 884, 909, 922
Pisi, A., 889
*Pissodes nemorensis*, on slash pine, relation to *Fusarium*, 861
Pistachio, Verticillium wilt of, polyethylene tarp for control, 200
*Plantago*
*lanceolata*, fungal infection in population of, patterns, 895
*major*, spiroplasma in, aphid acquisition of, 886
*Plasmodiophora brassicae*
chlorination effect on, 765
on crucifers
lime as control, 1003
soil matric potential effect, 870
solar heating for control, 244
detection in irrigation water, 765
populations in irrigation water sediments, 869
on radish, cultivar colonization, 887
Plaut, J. L., 917
*Pleurotus ostreatus*, on cottonwood, response, 903
Plourde, D. F., 250
Plum
leaf scald of
bacteria associated with, 869
etiology, 1156, (1160)
Plum pox virus, detection by electron microscopy, 400, (401, 402)
*Poa*
*annua*, Bayleton effect on growth, 563
*pratensis*
*Drechslera sorokiniana* on, herbicide effect on, 720
stem rust on, field reaction to, 264
Pocchiari, R. J., 864
Podleckis, E. V., 770
Podolsky, S. R., 250
*Podosphaera leucotricha*
on apple
effect on photosynthesis, transpiration, and carbohydrates, 392
fungicide effect on disease severity, 947
fungicide for, 908
fungicide testing, 769
photosynthesis and transpiration effect, 215
Pollution
air-
hydrogen fluoride, plants exposed to, system for, 877
jet fuel plant toxicity, 877
ozone
effect on tomato growth and disease, 893
potato cultivars tolerant to, 561
potato resistant to, diallel analysis, 560
silver maple leaf growth rate affected by, 562
soybean response to, 250, 1129
sweet corn sensitivity to, biochemical marker, 770
white pine screened for sensitivity, 770
ozone and peroxidase, effect on poplar leaves, 898
ozone and $SO_2$
*Fraxinus* response to, 804
use on soybean and poplar, chamber-less delivery system, 564
on white pine, effect on $CO_2$ exchange rate, 266
photochemical oxidant effect, on mountain vegetation, 766, 871
pollution sensitivity related to root disease and insects, on pines, 769
red maple bud injury from, 232
$SO_2$
bean injury from, soil moisture effect, 1208
effect on poplar, 860
lesion expansion from bacterial diseases of corn and soybean, 445
soil moisture effect on bean foliage, 559
*Xanthomonas phaseoli* on
kidney bean affected by, 888
soybean affected by, 234
$SO_2$ and oxidant effect, tomato yield and quality effect, 767
yellow poplar affected by, 892
water-
acidic precipitation effect on bacterial populations, 888
acid rain, fusiform rust on loblolly pine affected by, 864
Polston, J. E., 250
*Polymyxa graminis*, wheat spindle streak mosaic virus vector, evidence for, 1269
*Polyporus compactus*, on oak, decay from, 203
Pontius, G. A., 888
Poplar
Cytospora canker of, bark water relation, 558
diseases in north central states, 247
$SO_2$ effect and water relations, 860
$SO_2$ and ozone effect on, chamber-less delivery system, 564
vein yellowing and vein necrosis of, rhabdovirus associated with, 245
*Populus* spp.
air pollution effect on, detection of injury, 887
ozone injury and peroxidase activity, 898
rust of, races related to temperature, 421
Septoria canker of, fungicide and cultural management, 242
*Poria*
*placenta*
hardwood extractives inhibit decay from, 521
on sweetgum, polysaccharide-degrading complex from, 225
*subvermispora*, on pine, decay resistance to, 1248
Porta, J., 898
Porter, D. M., 214, 766, 871, 899
Postharvest diseases
French prune, fungi associated, 904
*Penicillium italicum* on citrus fruit, 328
potato to soft rot, sugar content effect, 290
stored sugar beet and sucrose yield, seed infection influence, 357
Postharvest pathology
fruits and vegetables, consumer losses in Chicago, 860
tomato bacterial soft rot, latent period, 1057
tomato fruit in water bacterial suspensions, 515
Potassium, soybean pod and stem blight affected by, 1027
Potato
bacterial agglutinans from, 235
bacterial wilt of, persistence in soil, in Costa Rica, 690
beet western yellows virus on, leaf roll syndrome, 105
chlorothalonil for, weathering of residues in, 205
*Colletotrichum coccodes* on, pathogen interaction, 232
early dying complex of, pathogens in stems of, 243
early dying disease, infection rate, 886
early dying of
plant stress modelling impact, 252
root growth assessment, field technique, 887
*Erwinia chrysanthemi* on, temperature, storage, and species effect, 224
Fusarium dry rot of, resistance of cultivars, 623
herbicide effect on soil-borne pathogen, 889
late blight epidemics of
analysis, 899
host and pathogen genotypes related to infection rate, 82
late blight forecast on, simulation model, 864
late blight of
epidemiology analysis by simulation modeling, 612
Ridomil for control, 214
leaf roll of, relation to beet western yellows virus, 193
oxidant effect on symptoms, yield, and quality, 867
ozone resistance in
diallel analysis, 560
physiology and heritability, 899
ozone tolerance in cultivars, 561
rhizobacteria for growth promotion, gnotobiotic conditions, 642
scab of, disease assessment, 891
seed piece inoculation with rhizobacteria, 590
soft rot susceptibility of, high reducing sugar content effect, 290
soil-borne fungi pathogenic to, fungicide effect on, 557
tubers of, fungus effect on lignin deposition, 878
Potato spindle tuber viroid
antibody production from, 250
detection and characterization of, 222
diagnosis by nucleic acid hybridization, 770
inhibitor of, in potato seedlings, 877
on tomato, double-strand RNA in extracts of, 875
Potato virus M, titer fluctuations in, 565
Potato virus S, unusual strain of, in North America, 255
Potato viruses S and X, ELISA for detection of, 201
Potato viruses X and Y, metribuzin interaction with, 1003
Potato virus Y
in aphids, detection in alimentary tract extracts, 807
aphid transmission of, 922
helper component of, chromatographic and electrophoretic behavior, 909
local lesion indicator for, 245
*Solanum* spp. resistant to, 873
Potato yellow dwarf virus, occurrence in California, 105
Powell, C. A., 250, 874, 900
Powell, C. C., Jr., 199, 251, 1225
Powell, N. L., 214, 766, 871
Powell, N. T., 865
Powelson, M. L., 857, 886, 900
Powelson, R. L., 105, 223, 1004
Powers, H. R., Jr. 900, 993
Pratt, G. C., 250, 1129
Pratt, R. G., 276, 900
*Pratylenchus* spp., on potato, aldicarb effect on, 104
*penetrans*, on yellow poplar root, *Verticillium* interaction, 770
*thornei*, Vapam for, irrigation application, 232
Preiser, F. A., 557
Price, M. A., 875
Pring, D. R., 260
Provvidenti, R., 872, 876
Prune, brownline of, relation to tomato ringspot virus, 30, (32, 33)
*Prunus*
*cerasifera* (see Plum)
*domestica* (see Prune)
*persica* (see also Peach)
storage decay of bare-root trees of, chemical control for, 256
Prunus necrotic ringspot virus, in rose, detection by ELISA, 767
Prusky, D., 900, 1124
*Pseudocercosporella herpotrichoides*
temperature and water effect, 1004
wheat resistant to, stem characteristics, 107
*Pseudomonas* spp.
agglutinins in, properties, 1002
comparison of pathogenicity, toxin, and plasmids in species of, 765
fluorescent pigment from, antifungal activity of, 106
*Gaeumannomyces graminis* interaction on wheat rhizoplane, 105
*Gremmeniella abietina* germination inhibited by, 562
growth on tobacco callus, 200
growth promoting effect of, iron regulation by, 231
growth-promoting isolate, siderophore from, 908
on parsnip, bacterial blight from, 1238, (1239)
pathogenic strains of, plasmid homologies, 212
plant growth-promoting, root microflora displacement, 1020
siderophore produced by, plant growth effect, 231
siderophores of, mechanism of suppressive soils, 232
on sugar beet roots, fungus relation, 259
on take-all conducive and suppressive soils, 264
*alboprecipitans*, on sweet corn, infection of, 171, (172, 173)
*cepacia*, on wheat, relation to *Septoria*, 229
*fluorescens*
bacteriostatic activity of pigment from, 906
cell wall protein relation, 200
identification using polyacrylamide gel electrophoresis, 769
killed cells of, effect on plant growth, 1006
*glycinea*, on soybean, multiplication in aerosols, 259
*lachyrmans*
on cucumber
nonchemical control of, 235
relation to other diseases, 203
*marginalis*, on tomato fruit, latent period, 1057
*phaseolicola*
agglutination of, correlation with bean

resistance, 872
on bean
inoculation method effect, 230
internal seed infection, 252
population trends of, 257
infectivity of, 244
*phaseolicola*, multiplication of, host genotype effect, 1307
on *Pachyrrhizus erosus*, in Hawaii, 203
RNA products of, 212
*savastanoi*
IAA genes in, mutagenesis of, 210
IAA produced in, 104
virulence gene in, identification of, 868
*solanacearum*
bacteriocin-producing strains of, Granville wilt protected by, 866
binding to host culture cells, 872
lipopolysaccharide-defective mutant of, 880
lipopolysaccharide produced by, characterization of, 201
on potato
agglutinans from, 235
resistance evaluation, 204
selective medium for, 220
in soil, persistence in Costa Rica, 690
survival in soil and roots, 877
on tobacco callus, interaction with *Phytophthora* zoospores, 242
on tomato
infectivity titrations of, 891
inoculum density effect, 897
resistance related to lectins, 237
transposons introduced into, P-1 plasmids for, 639
*syringae*
acid precipitation effect on populations of, 888
antagonist for Dutch elm disease, 1007
on apple
bud survival, 864
survival in leaf scar, 557
on barley, kernel spot, 1117
on bean
chemotaxis as factor, 896
dissemination, 890
epiphytic populations, 547
resistance screening, 857
survival and dispersal, 881
Dutch elm disease controlled by, 1006
ice nucleation activity of
localization and characterization of, 256
on oats, 881
ice nucleation deficient mutants of, 237
ice nucleation in, peach canker relation, 109
immunity to phaseolotoxin, mechanism, 257
indigenous conjugative plasmid in, characterization of, 257
on marigold, inoculum source, 907
membrane protein composition of, plasmid effect, 883
plasmid-chromosome hybrids in, 907
plasmid in
analyses of, 869
chromosome mobilization ability of, 869
conjugal transfer, 220
plasmid RP41 in isolates of, fate, 911
serotypes of, 870
on snap bean
cropping pattern effect, 237
epiphytic population related to brown spot, 890
incidence and severity of, 243
on soybean, multiplication on leaves from aerosols, 532, (534)
strains of, bacteriocin production in, 255
syringacin W-1 from, purification, 904
syringomycin and syringotoxin produced by, corn mitochondria affected by, 870
on tomato, fungicide combinations, 563
transformation of, by plasmid DNA, 221
on wheat, tagetitoxin produced by, 891
on wild rice, relation to *Xanthomonas campestris*, 862
*tabaci*, on cucumber, 870
*tagetis*
on marigold, symptoms, 259
on sunflower, apical chlorosis from, 221
*tomato*
copper compounds for, 248
survival in tissue and soil in Georgia, 884
survival of, in Michigan, 218
on tomato
detection technique in soil and plants, 1187
resistance technique, 872
*Pseudoperonospora*
*cubensis*, on cucurbits, Ridomil resistance in, 251
*humuli*
on hops
epidemic forecast, 1005
metalaxyl for, 1005
*Pseudotsuga menziesii, Phytophthora megasperma* on, host specificity, 65
*Puccinia*
*antirrhini*, on snapdragon, infection affected by cereal straw smoke, 106
*canaliculata*, on nutsedge, 899
*chondrillina*
life cycle, 1002
on rush skeleton weed, rust for control, 856
rush skeleton weed controlled by, epidemiology, 839
*coronata*
haustorial ontogeny, symposium, 975, (978, 980, 981)
on oats
chemical mutagen effect on, 254
environmental effect, 238
epidemiology in South Carolina, 886
pathogenicity of, genetics, host range, 156
on rye, overwintering, 562
on wild oat, resistance source, 904
*graminis*
on cereals, slow rusting genetics, symposium, 989
durable resistance in, 567
haustoria ontogeny, symposium, 975, (978,979)
nutrient uptake of, symposium, 983
on wheat
adult plant resistance, 181
slow rusting vs. specific resistance, 1184
*graminis tritici*
on *Aegilops*, resistance to, 895
on wheat
genetic control of disease expression, 425, (426)
low receptivity to infection, 732
slow rusting inheritance, 835
*hordei*, on barley, latent period measurement, 199
*obtegens*, on Canada thistle, ecotypes resistant to, 262
*polysora*
on corn, inoculum density effect on germination and infection, 769
uredospore germination and infection, temperature and humidity effect, 881
*recondita*
on wheat
epidemic parameters, 716
genetics of pathogenicity, 652
infection type analysis, letter to editor, 1010, *1228*
infection type related to slow rusting, 106
yield effect in Louisiana, 200
*recondita tritici*, on wheat, interplot interference, 862
*sorghi*
on corn
gene transfer from *Tripsacum*, 518
response surface model, 895
*striiformis*
*on Triticum diccoides*, resistance source, 901
on wheat
chitosan-like compounds in, 222
epidemic parameters, 716
on winter wheat, epidemiology, 461
*substriata*
on millet, resistance to, 878
on pearl millet, triadimefon for control, 912
Pullman, G. S., 900, 954, 959, 1285
Punja, Z. K., 251, 900, 1092, 1099
Purcell, A. H., 105, 107, 108, 251, 429, 876, 900
Purcifull, D. E., 202, 889, 913, 1221
Pusey, P. L., 770
*Pyrenochaeta lycospersici*
sporulation on agar, 1005
on tomato, fumigation for, 207
*Pyrenophora*
*graminea*, on barley, seed treatment for, 1005
*teres*
on barley
bacteria as biocontrol agent, 902
rating method, 881
resistance to, 1115
*trichostoma*
on wheat
microorganism effect on, 876
tillage effect, 220
virulence, 211
*Pyricularia*
*grisea*, on ryegrass, pathogenic isolates of, 909
*oryzae*
melanin biosynthetic enzymes in, 912
on rice
infection rate prediction, 239
resistance to, 263
slow-blasting resistance in, components, 608
tricyclazole for, 206
*Pythium* spp.
acylalanine-type fungicides resistant to, 558
on bean, sludge compost effect, 238
bedding plant damping-off, evaluation method, 1225
on cotton, soil solarization for, 954
damping-off from, in greenhouse, 258
on geranium, wound-healing relation, 209
microwave oven treatment for pasteurization, 873
oospores of
production technique, 232
tetrazolium for detection, 907
on pea and radish, biocontrol, 569
selective medium for isolation, 868
on turfgrass, pathogenicity and control, 913
*aphanidermatum*
on bentgrass, fungicides for, 765
on duckweed and water-meal, pathogencity, 867
ecology of, technique for studying, 282
on radish, suppression in soil in Mexico, 891
on sugarbeet, epidemiology, 905
on tomato transplants, storage rot by, 885

cyst nematode population of, nematicides for, 898
damping-off of, etiology in Virginia, 767
disease diagnosis of, computer consulting system for, 242
foliar diseases of
in Illinois, 884
leaf area loss, 884
fungi on roots of, recovery factors, 1117
fungicide seed treatment in, factors affecting, 911
Fusarium blight of, resistance screening, 769
*Fusarium* spp. on seeds and tissues of, colonization from soil, 693
glyphosate effect on glyceollin synthesis, relation to organisms, 881
*Heterodera glycines* on, growth effect, 198
hypersensitivity in, bacterial induced, light effect, 111
injury to, measurement using chloropyll assay of cotyledon, 885
isoflavanoids of, antibacterial activity by, 766
nitrogen fixation of, nodule-colonizing fungus effect on, 265
oil thermotherapy of seed, 267

ozone effect on yield, 1118
ozone response in, 1129
peanut stunt virus on, strain interaction, 767
*Phomopsis* on
environment, fertility, and disease effect on, 1027
pods of, detection, 240
*Phytophthora megasperma* on
age and glyceollin production effect on, 94
electron microscopy of reaction, 617, (618–621)
f. spp. and host specificity, 276
host specificity, 65
race-specific resistance in, 504
Phytophthora root rot of
in Maryland, 764
Ridomil for, 234
pod and stem blight of
effect of seedborne inoculum, 544
seed and soil-borne fungi relation, 218
*Pseudomonas syringae* on leaves of, aerosol inoculum, 532
Pythium seedling rot of, etiology and epidemiology, 134
*Rhizobium japonicum* on
binding suppressed by nematodes, 882
root rot fungi and mycorrhizal effect, 267
Rhizoctonia seedling disease of, herbicide effect on, 1115
rust of, telia and teliospore formation in, 1111, (1112)
seed development of, acid rain and oxidant effect, 565
seed of, fungi associated with, 229
seed quality in, herbicide effect, 862
seed viability in Tropics, factors affecting, 898
Septoria brown spot of, benomyl efficacy, 438
$SO_2$ and ozone effect on, chamber-less delivery system, 564
systemic fungicides for, root rot control, 897
thiabendazole deposits on, rainfall effect, 864
tobacco ringspot virus on, root location, 894
virus free plants in, use of ELISA, 250
white mold of, incidence, 867
*Xanthomonas phaseoli* on
$SO_2$ effect, 234
$SO_2$ effect on lesion expansion, 445
Soybean mosaic virus
anti-, purification of, 225
aphid nontransmissibility of, mechanism, 208
electron microscopy of host, 227
strains of, ultrastructural comparison, 883
virus content in soybean cultivars, 882
Spadafora, V. J., 564, 905
*Spathiphyllum* sp., *Cylindrocladium floridanum* on, new root and foliar disease of, 253
Spear, M., 565
Spearman, L. C., 106, 1007
Spencer, J. A., 905, 913
*Sphacelotheca reiliana*, on corn, new Minnesota disease, 906
*Sphaerotheca*
*fuliginea*, on cucurbit, fungicides for, 908
*pannosa*, on rose, biotypes of, 860
Spilker, D. A., 256, 1027
Spinach, virus of, new host range in Texas, 198
Spiroplasma
acquisition by aphid, from *Plantago major*, 886
horseradish brittle root association, 1067, (1068–1071)
transmission by leafhoppers, 107
X-disease relation, 108
*Spiroplasma* spp.
from honeybee and flowers, defined medium for cultivation, 559
nutritional requirements of, 866
sucrase activity of, 906
*citri*
antibiotic resistance in, 442
arginine aminopeptidase activity of, 258
brittle root disease of horseradish relation, 1073, (1075–1078), *1228*
cultivation in wax moth larvae, 408
culture medium for, 866
growth factor in, purification in horse serum, 211
growth requirements, 558
on horseradish
brittleroot disease caused by, 874
factors, 903
leafhopper vectors in Arizona, 856
motility and morphology, 913
in periwinkle, 889
control treatment, 914
spiroplasma from *Calliandra* compared to, 202
Splittstoesser, W. E., 251
Spore samplers, acoustical particle counter, design and use, 152
*Sporidesmium sclerotivorum*
biological control use in function, 90
*Sclerotinia* parasitized by, 764
Spotts, R. A., 256
Sprang, M. L., 256
Spring, D. E., 215, 256, 392
Spruce
black-, dwarf mistletoe of, mortality model, 201
Colorado blue-, Cytospora canker of, epidemiology, 941
seed fungi from, in Newfoundland, 904
Spurr, H. W., Jr., 905
Squash mosaic virus
from *Cucurbita foetidissima*, isolation, 252
detection by immunodiffusion test, 1221
electron microscopic serology of, 252
Stace-Smith, R., 468
Stack, R. W., 241, 257, 1117
Stadt, S. J., 252, 257, 1307
*Stagonospora arenaria*, on orchardgrass, anatomy of, 254
Stall, R. E., 894, 905, 1024
Stanghellini, M. E., 864, 905, 906, 1008
Staples, R. C., 227

Stutz, J. C., 258, 564, 906
Styer, D. J., 259
Stynes, B. A., 259
Sugar beet
bacterial vascular necrosis, nitrogen and spacing effect, 605
bacterium and fungus interaction on root surfaces, 259
*Cercospora beticola* on, race C2, histopathology, 633, (634–637)
*Erwinia* spp. and subspp. compared, nutritional differentiation, 1037
lesions from *Cercospora* toxin, ultrastructure, 1272, (1275–1278)
microorganisms of, invertase activity, 864
*Phoma betae* on
seed infection and sucrose yield effect, 357
yield effect, 206
powdery mildew of
crop loss in Wyoming, 105
photosynthesis factors, 220
storage rot and juice quality of, research plot variability, 206
X-disease of, leafhopper transmission by, 900
Sugarcane
mosaic and ratoon stunting disease of, hot-water cure for, 859
pineapple disease of, fungicide for, 210
ratoon stunting disease of
bacterial cause, 213
pathogenicity to Sudan grass and Bermuda grass, 1303, (1305)
resistance, 887
serological relations in causal bacterium, 219
water relations, 230
ratoon stunt of, coryneform bacteria relation, 236
Sugarcane mosaic virus, on sorghum, ultrastructure, 879
Suhayda, C. G., 656, 697
Sukul, N. C., 372
Sumner, D. R., 259, 860, 899, 907
Sunflower
apical chlorosis of, *Pseudomonas tagetis* cause, 221
*Rhizopus* on heads of, inoculation technique, 458, (459)
Sclerotinia stalk rot of
control, 1116
incidence in Dakotas and Minnesota, 221
*Verticillium dahliae* on, resistance to, 231
Sung, J.-M., 499
Sung, Z. R., 897, 907
Surico, G., 259, 532, 870

Tobacco
black shank of
calcium nutrition and susceptibility, 772
epidemic analysis in North Carolina, 865
blue mold of
epidemic of 1980, 560
epidemic in Ontario, 241
epidemiology in North Carolina, 562
metalaxyl for control, 897
blue mold resistance in, induced by prior inoculation, 783
cadmium accumulation and distribution, significance, 209
cell membranes of, destruction by cercosporin, 869
diseases of, phloem translocation of factors, 241
*Glomus macrocarpus* on, growth inhibited by, 224
management practices in North Carolina, 911
*Meloidogyne hapla* on, 58 spp. reaction, 771
novel proteins in leaves of, bacterial lipopolysaccharide treatment, 889
ozone weather fleck injury, herbicide effect, 770
*Peronospora tabacina* on, histopathology in, 73, (74–76)
*Phytophthora parasitica* on, spore number related to infection and mortality, 69
potyviruses of, resistance to, 229
TMV on, viral protein in, 562
virus diseases of, in Tennessee, 895
Tobacco etch virus, temperature effect on, 227
Tobacco mosaic virus
on ash, detection with latex particle agglutination, 558
double stranded RNA in, 566
effective mutants of, isolation and propagation technique, 295
effect on systemic resistance to pathogens and insect, 297
necrotic strains of, effect on tobacco, 1117
in *Nicotiana sylvestris*, resistance in haploid plants, 896
resistance to insects induced by, 241
RNA of, enzymatic methylation of, 265
southern bean mosaic virus interaction, liposome use, 856
strains of
ELISA specificity, 103
host protein encapsidation in, 559
on tomato, temperature effect on resistance, 319
viral uncoating role in cross protection, 903
virions of, host protein in, 210
Tobacco necrosis virus, on cucumber, relation to other diseases, 203
Tobacco rattle virus, new viral RNA from, 204
Tobacco ringspot virus
on ash, detection with latex particle agglutination, 558
biological and biochemical characteristics, 218
on cowpea, symptom development, 7, (8)
ELISA for detection, in leaf disks, 308
on soybean roots, 894
Tobacco vein mottling virus, aphid transmission of, 922
Todd, F. A., 560, 911
Toler, R. W., 860
Tolin, S. A., 227, 261, 767, 768, 859, 883
Tomato
bacteria in fruit of, infiltration effect, 515
bacterial speck of, resistance technique for, 872
cadmium treatments for, micronutrient partitioning alterations, 559
cadmium and zinc treatments for, accumulation, 564
*Cladosporium fulvum* on, glycoprotein toxin in, 561
*Colletotrichum coccodes* on, temperature effect, 249
corky root of, soil fumigation for, 207
*Corynebacterium michiganense* on, seedling response, 214
*Erwinia* and *Pseudomonas* on fruit of, latent period, 1057
fruit rot of, organisms associated, 260
fruit rot and weed density effect, 248
Fusarium crown rot of
biocontrol, 1251, 1257
factors affecting, 167
*Fusarium oxysporum* of, resistance to, ethanol effect, 213
Fusarium wilt of, mycorrhizal fungi relation, 894
in hydroponic system, chlorine for root pathogens, 883
metalaxyl translocation in, 509
nematode and Fusarium wilt of, factors affecting, 856
ozone injury in, effects, 893
post-harvest diseases of, general gas law, 202
Rhizoctonia soil rot of, tolerance to, 859
Septoria leaf spot of, resistance to, 764
$SO_2$ and oxidant effect on yield of, 767
storage rot of transplants, *Pythium* cause, 885
tobacco mosaic virus on, temperature effect on resistance, 319
Verticillium wilt of, toxic synergism in, 563
virus on, characterization, 1007
Tomato aspermy virus, tomato strain in Maryland, 769
Tomato bushy stunt virus, protein synthesis in, by RNA, 251
Tomato mosaic virus
cell movement and plasmodesmata relation, 903
on plant debris in soil, overwintering, 234
Tomato ringspot virus
on apple and peach, dandelion role, 900
isolates of, serological comparison, 250
on plum and peach, relation to brownline of prune, 30, (32, 33)
on stone fruit, immunosorbent assay for, 227
on strawberry
first report, 210
nematode vector, 1149, (1151)
*Xiphinema rivesi*
associated with, in Pennsylvania, 767
vector for, 874
Tomato yellow mosaic virus, ultrastructural cell changes, 524, (525–528)
Tomato yellow top virus
host range and transmission, 1004
resistance to, 1005
Tomerlin, J. R., 909
Tomimatsu, G. S., 261, 771
Tooley, P. W., 261
Toussoun, T. A., 216, 874
Toxin
aflatoxin
on corn, resistance to *Aspergillus flavus*, 231
production of, moisture and injury effect, 874
victorin, production increased by oat flakes, 853
*Toxoptera* sp., on cardamom, virus vector, 104
*Tradescantia* sp., leaf distortion disease of, potyvirus causing, 602, (603)

on apple
benomyl-resistant strains of, 529
cultivar effects, in California, 106
epidemic parameters, 716
fungicides for, 230
postinfection control of, triazoles, 737, (740, 741)
apple phylloplane microbes antagonistic to, 857
ascigerous state of, temperature effect, 560
ascospore maturation in, model for and environmental factors affecting, 228
ascospore maturity model of, evaluation in North Carolina, 1030
ascospore productivity in, methods for study, 224
latent period model for, 909
Verhalen, L. M., 202
Verma, P. R., 263
*Verticicladiella*
*procera*, on *Pinus* spp., 233
*wagenerii*
on Douglas-fir, vectors for, 266
variance of, infra-specific, 879
variation in, 227
*Verticillium*
*albo-atrum*
on alfalfa
cultivar reaction, 870
seed transmission, 208
on cotton, exudates related to susceptibility, 771
on tomato, toxic synergism in, 563
on yellow poplar roots, nematode interaction, 770
*dahliae*
ammonium sulfate effect on, 871
on *Cinnamomum camphora*, fungicides for, 109
on cotton
copper for, 1002
epidemiology, 900
flooding and rice culture effect, 1285
root colonization, 876
soil solarization for, 954
ecology of, technique for study, 282
on eggplant, black plastic mulching effect on, 896
on maple, etiology, 340, (343)
melanin biosynthetic enzymes in, 912
on pistachio nuts, polyethylene tarps for control, 200
on potato
aldicarb for control, 104
early dying complex, 243
histopathology, 249
resistance technique, 1118
potato stem colonized by, 901
on red maple, water potential, 245
on rosemary, field infection, 900
on safflowers, susceptibility to cotton strains, 771
in soil, medium for isolation, 230
soil solarization for, time and temperature effect, 959
on sunflower, resistance to, 231
on tomato, *V. albo-atrum* comparison, host origin and cropping system effect, 98
Vesonder, R. F., 910
Vessey, J. C., 263
*Vicia faba*
rust resistance in, 210
virus-like particles in, double-stranded RNA, 878
Vidaver, A. K., 207, 212, 220, 221, 255, 865, 893, 903, 904
Vigil, F. R., 205
*Vigna unguiculata* (see Cowpea)

Villereal, R. L., 239, 263, 608
Vincent, J. R., 911
Vineis, P. D., 893
Viruses
antigen detection, ELISA technique for, 103
in carnation cultivars, survey using indirect ELISA, 891
caulimovirus, ultrastructure on *Saponaria*, 645, (648–650)
closteroviruses, double-stranded RNA from, 870
detection of, use of fluorescence, 234
double-stranded RNA from infected plants, isolation method, 888
ELISA antisera raised in rabbit injection, 891
ELISA, cleaning technique for cassette re-use, 899
ELISA for detection, in leaf disks, 308
ELISA for soybean germplasm exchange, 250
ELISA technique, analysis and design, 206
enzyme-linked immunosorbent assay testing of, polystyrene beads used for, 227
ILAR, ELISA method for detection, 106
leaf proteins from infection, electrophoresis for detection, 223
plant viruses compared to chronic bee paralysis virus, 880
potyviral genome, genetic map of, 225
potyvirus, on *Tradescantia* and *Zebrina* spp., 602
rhabdoviruses, replication in aphids, 598
serological detection of, passive hemagglutination technique for, 306
tombusvirus, comparative serology, classification problems, 572, (573, 575)
tymoviruses, electron microscopy of, particle trapping, 204
virus-vector interaction, colloidal kinetic model of, 866

Wheat
bacterial mosaic disease on
in Alaska, 893
hosts, 207
*Cephalosporium gramineum* on, toxic metabolite relation to stomata and water, 211
Cephalosporium stripe of, management practice affecting, 888
common root rot of
fungi in Wyoming, 1005
seed depth and rate effect, 909
disease detection by infrared photography, 867
foliar diseases of, fertilizer effect, 248
fungi associated with, in Minnesota, 910
genotype mixture in cultivar, 875
glume blotch and black chaff of, photosynthesis and transpiration effect, 1173
*Helminthosporium* on, seedling and adult plant resistance to, 257
leaf rust of, inheritance of virulence, 652
multiline cultivars of, epidemiology, 872
nematode resistance in, 857
patulin sensitivity in cultivars of, 253
powdery mildew of
"defeated" genes, 1315
epidemiology and disease severity, 1015
forecasting system for, 239
lesion density effect on spore production, 248
resistance, 245
*Pythium arrhenomanes* on, seedling development from infection, 316
Rhizoctonia spring blight of, yield effects, 227
rust of, infection type analysis, letter to editor, 1010, *1228*
seedlings of, sterile growth, 200
*Septoria* and bacteria on leaves of, relative effect, 229
Septoria glume blotch of, pathogenicity variation of isolates, 1080
Septoria leaf blotch of, inheritance of tolerance to, 119
*Septoria nodorum* on
pathogenic variation of isolates, 593
on seed of, detection, 212
sharp eyespot of
in Ohio, 890
two *Rhizoctonia* isolates, 856
slow rusting of, inheritance, 835
stem rust of
adult plant resistance, 181
genetic control of disease expression, 425, (426)
low receptivity to infection, 732
slow rusting vs. specific resistance, 1184
stripe rust epidemic of
quantitative relations, 461
temperature effects on, 209
stripe rust of, chitosan-like compounds in, 222
stripe rust resistance in, temperature sensitive genes for, 218
strawbreaker footrot of, resistance to, 107
take-all decline of, not from virulence loss, 211
take-all of
liming effect on, 108
plant nutrient effects, 108
rotation crop effect, 189
tan spot of, tillage effects on incidence, 220
white blotch of, bacterial cause, 226
Wheat spindle streak mosaic virus, *Polymyxa graminis* as possible vector, 1269
Wheat streak mosaic virus
on corn, temperature effect, 823
cytoplasmic inclusions from, 241
Montana isolate of, 1008
spread of, corn relation, 217
Wheat striate mosaic virus

on corn, in South Dakota, 229
ultrastructure of, 217
